

STATES OF DELIBERATION

1st November, 2016

Proposition No. P. 2016/46

AMENDMENT

Proposed by: Deputy P Roffey

Seconded by: Deputy J Kuttelwascher

Policy & Resources Committee

The States of Guernsey Annual Budget for 2017

To insert, immediately after Proposition 34, the following Proposition:

"35. To instruct the Policy & Resources Committee, in conjunction with the Committee *for the* Environment & Infrastructure, to report to the States no later than the date of submission to the States of the budget report for 2018, on the possibility of re-introducing motor tax."

Explanatory note

This amendment seeks to enable the States to consider a policy that would potentially both broaden the tax base and recognise that changing technology within the automobile industry will make duties on petrol and diesel an impractical way of taxing motoring in the medium term. If introduced, motor tax would also allow the duties on petrol and diesel to be reduced.
