

At the Princess Elizabeth Hospital, The Medical Unit provides care for a variety of medical conditions from endocrine, cardiac, pulmonary, renal, haematological and malignant conditions. The Medical Unit offers care provided by a multi-disciplinary team, which includes physio and psychologist.

Under Guernsey's healthcare system, there are no junior doctors. Patient care is managed by the nine consultant physicians attached to the medical unit, each of whom has an area of special interest. This environment provides an excellent grounding for nurses committed to high-quality care who are embarking / developing their careers. All new staff are mentored through an induction preceptorship period; whilst ongoing personal development and education are actively encouraged.

Assessment and Rehabilitation

Our Assessment and Rehabilitation ward provides 24 hour care to a client group with

varying rehabilitation needs including stroke, Parkinson's disease, balance and falls, post orthopaedic and general surgery. Admissions to the ward are predominantly from surgical/medical wards, Day Assessment Unit and community.

The unit is a multi-disciplinary service which provides therapy and rehabilitation. The multi-disciplinary team input is over 5 days (Monday-Friday) with nursing support for 7 days a week.

All teams include qualified professionals with expertise in the field of rehabilitation.

For further information and to apply, please go to gov.gg/healthandsocialcare or email Heather West at: heather.west@gov.gg or Tracy Fearis at: tracy.fearis@gov.gg
