

Access to Public Information Request

Date of receipt: 18th August 2019

Date of response: 16th September 2019

Van and commercial vehicle sales in Guernsey

Request:

Can you please issue me with the last five years statistics by year for van and commercial vehicle sales by manufacturer in Guernsey please.

Response:

Thank you for your recent Access to Public Information Request which has been handled by Driver and Vehicle Licensing on behalf of the Committee *for the* Environment and Infrastructure.

The data available in Appendices 1-5 below is extracted from the Committee's vehicle registration database and includes new and not-new commercial vehicle registrations for the period 2014 to 2018. It is worth noting that the registration database classifies vehicles such as buses, tractors, forklifts and microvans as commercial vehicles but the information provided includes vehicle model details should you need to refine it further.

The vehicles that have been imported new do not have a country recorded in the final column (Foreign Country). Where details are included in the final column it is when the vehicle was registered prior to importation to Guernsey. You may note that occasionally Guernsey is recorded in this column. This relates to when a vehicle was removed from the register but subsequently this was found to be in error. By way of example, a vehicle is declared exported but it has remained on Island and is subsequently re-registered.

Vehicle Make	Vehicle Model	Body Type	Body Group	Foreign Country
