08 September 2021

Dear Planning Service,

Regarding your recent correspondence of our application FULL/2021/1872.

The current block plans have the correct number of panels, and position. I'm aware one of the pictures on our design plan shows an additional array of panels on the main roof, however this can be ignored and are not part of the application.

Section F has been amended on the application and a statement of significance has been enclosed.

Yours sincerely

Damien Gill  
The Little Green Energy Company.
