

THE STATES OF DELIBERATION
of the
ISLAND OF GUERNSEY

POLICY & RESOURCES COMMITTEE

GOVERNMENT WORK PLAN 2022
Investing in Islanders, our Island and our Future

The States are asked to decide:-

Whether, after consideration of the policy letter entitled 'Government Work Plan 2022' dated 12th May 2022, they are of the opinion:-

1. To direct the Policy & Resources Committee to apply category 1 status to the following actions in the Government Work Plan:

Housing:

- i. Evaluate and implement actions to address private housing market capacity and affordability;*
- ii. Evaluate and implement actions to address key working housing capacity and affordability;*
- iii. Progress proposals to the States by December 2022 on housing need and on management of States' housing stock.*

2. To direct the Policy & Resources Committee to apply category 1 status to the following action in the Government Work Plan:

Population:

Determine what the Island's future population and immigration policy needs to deliver and set out a pathway to address the challenges that are being faced by the economy today;

3. To direct the Policy & Resources Committee to apply category 1 status to the following actions in the Government Work Plan:

Skills and human capital development:

- i. Agree a plan to skill our community to meet its needs; and*
- ii. Embed implementation to the end of the political term;*

4. To direct the Policy & Resources Committee to apply category 1 status to the following actions in the Government Work Plan:

Improve living standards:

- i. Review minimum income standards with initial focus on income support and winter fuel allowance; and*
- ii. Develop proposals on the funding options for long-term care.*

5. To direct the Policy & Resources Committee to apply category 1 status to the following actions in the Government Work Plan:

Health recovery:

- i. Determine proposals to provide targeted support based on affordability in respect of primary care appointments and access to aids and adaptations; and*
- ii. Establish whether or not to explore the introduction of a compulsory insurance scheme for primary care;*

6. To direct the Policy & Resources Committee to apply category 1 status to the following actions in the Government Work Plan:

Support the next generation:

- i. Resource work to conclude amendments to the primary Children Law and enabling Ordinances; and*
- ii. Invest in education delivery through operational support to be delivered within schools and settings following Ofsted Inspection;*

7. To direct the Policy & Resources Committee to apply category 1 status to the following actions in the Government Work Plan:

Energy resilience:

- i. Develop the electricity strategy for the Island; and*
- ii. Implement actions to improve the outlook for an increase in use of renewables;*

8. To direct the Policy & Resources Committee to apply category 1 status to the following actions in the Government Work Plan:

Enabling climate change mitigation and adaptation:

Respond to the agreement in principle to extend the Paris Agreement to the Island by establishing an expert panel to scope a proportionate and pragmatic 'pathway to net zero' for consideration by the States in the 2023 Government Work Plan.

9. To direct the Policy & Resources Committee to apply category 1 status to the following actions in the Government Work Plan:

First steps for the blue and green economy:

Create plans, based on best available evidence, that maximise the sustainable social and economic use of our island and marine environments, including support

for emerging economic opportunities (including international trade agreements), tourism, Green Finance and renewable energy.

10. To direct the Policy & Resources Committee to apply category 1 status to the following actions in the Government Work Plan:

Regeneration - future harbour requirements:

Agree the preferred direction for Guernsey's future harbour requirements to ensure that any regeneration of the seafront is within a clear strategic framework.

11. To agree that all Committees of the States will work with the Policy & Resources Committee to prioritise and resource the progression and completion of the priority recovery actions in the Government Work Plan;
12. To note the continued priority resourcing applied by the States of Guernsey in preparation for the MONEYVAL 2024 inspection as set out in the 'ensure compliance with agreed international agreements/standards' workstream under Priority 2 of the Government Work Plan 2022 framework.
13. To approve that actions are progressed in 2022 and 2023 under Priority Themes 1 and 2, and where resources permit, are progressed as set out in Priority Themes 3 and 4 of the Government Work Plan framework in Appendix 3 of this policy letter;
14. EITHER,
 - A. To direct –
 - i) the Committee *for* Health & Social Care to develop the action mandate and resource requirements necessary to implement Resolutions 1, 2 and 3 made by the States of Deliberation on 27th January 2022, following consideration of the policy letter entitled "Living Responsibly with COVID-19" (Billet d'État No. II of 2022, Article 1) and to submit the action mandate to the Policy & Resources Committee on or before 24th March 2023, and
 - ii) the Policy & Resources Committee to update the 2022 Government Work Plan accordingly, and, having consulted with the Committee *for* Health & Social Care, to include in the Government Work Plan Update to be debated in June 2023 the resource requirements for, and the impact of any prioritisation of this work on, the phasing and achievability of other actions in the Government Work Plan during this term of government.

OR, only in the event that Proposition 14A is not approved,

- B. To direct –

- i) the Committee *for* Health & Social Care to develop the schedule of work and resource requirements necessary to implement Resolution 3(iii) made by the States of Deliberation on 15th July 2020, following consideration of the policy letter entitled “Justice Review Report” (Billet d’État No. XV of 2020, Article 16), to enable the review of the legal status of cannabis to be undertaken and to submit the schedule to the Policy & Resources Committee on or before 24th March 2023, and
 - ii) the Policy & Resources Committee to update the 2022 Government Work Plan accordingly, and, having consulted with the Committee *for* Health & Social Care, to include in the Government Work Plan Update to be debated in June 2023 the resource requirements for, and the impact of any prioritisation of this work on, the phasing and achievability of other actions in the Government Work Plan during this term of government.
- 15. To rescind extant Resolutions as set out in Appendix 9 of this policy letter.
- 16. To approve the proposed Schedule of prioritised drafting of legislation as set out at Appendix 2 of this policy letter.
- 17. To note the revised schedules of costings for delivery of the Government Work Plan Priorities and authorise the Policy & Resources Committee to approve transfers of funding to 2022 Committee budgets and make specific allowance in recommended Cash Limits for 2023-2025 in order to resource:
 - i. Recovery actions (one-off and ongoing expenditure) over the period 2022-2025 for the specific initiatives detailed in Annex 3 of Appendix 8;
 - ii. Revenue impact of capital investment (ongoing expenditure) over the period 2022-2025 for the specific initiatives detailed in Annex 2 of Appendix 8; and
 - iii. Reshaping government initiatives (transformation) (one-off expenditure) over the period 2022-2025 for the specific initiatives detailed in Annex 2 of Appendix 8.

THE STATES OF DELIBERATION

of the
ISLAND OF GUERNSEY

POLICY & RESOURCES COMMITTEE

GOVERNMENT WORK PLAN 2022
Investing in Islanders, our Island and our Future

The Presiding Officer
States of Guernsey
Royal Court House
St Peter Port

12th May 2022

Dear Sir

Executive Summary

- 1.1 The most critical work for the year ahead must respond to both local and international pressures. The actions of the States of Guernsey need to be focused and co-ordinated, to ensure that their limited resources are directed to deliver outcomes which:
- secure the Bailiwick’s resilience;
 - maximise the community’s collective potential; and
 - ensure we are competitive as an economy.
- 1.2 External influences continue to require significant resource. There is an ongoing demand to manage the impact of the post-Brexit arrangements with the UK and other jurisdictions; and also to demonstrate compliance with international standards to ensure the Bailiwick’s long-term prosperity through trade agreements and compliance with international conventions, standards and norms. Significant among the latter is the continued preparation for a MONEYVAL inspection which will continue to be a priority for resourcing given its importance to our economic wellbeing and international reputation.
- 1.3 The Island’s housing needs and the increasing cost of living are the two most pressing and immediate domestic pressures which the States must tackle.
- 1.4 The Policy & Resources Committee has considered the advice of the Committees of the States and consulted States’ Members, and in its capacity to co-ordinate the work of the States it has phased actions in the Government Work Plan (GWP)

which balance the needs of the Island and Islanders, with an emphasis on housing, energy security, living standards, health and wellbeing, responding to climate change, and supporting long-term economic competitiveness.

- 1.5 The States are invited to consider these actions for priority resourcing as category 1 actions.
- 1.6 The wider recovery actions in Priority Theme 3 for this political term identify the category 2 work (i.e. the work that Committees have started) or the category 3 work (i.e. the work that Committees have recommended is commenced). The work in these categories either discharges extant Resolutions or seek to introduce new areas of work identified as important by the sponsoring Committee. The Committees are also seeking to rescind extant Resolutions where the passage of time has demonstrated that the work is no longer critical.
- 1.7 Year one of the GWP demonstrated that capacity is such that while delivering against the top ten recovery actions has generally been achieved, it has been challenging in the context of discharging actions related to the management of COVID-19 and Brexit, Re-shaping Government activity, and more recently work in relation to the impact of the Russian invasion of Ukraine.
- 1.8 It remains the case that the States need to identify their priority actions to use their resources to best effect. The Policy & Resources Committee identified this in the stage 1 policy letter¹ of 12th February 2021 -

“The ambition of the new Assembly is prodigious and cannot easily be met, so the reality is that it will be making difficult decisions.”
- 1.9 Completing actions which have the most potential benefits for our community and economy, and taking a proportionate approach that reflects the Bailiwick’s scale and size, is increasingly important in the States’ decision-making. Where Committees are proposing new work, the Policy & Resources Committee is considering how such work can be managed given the overall picture.
- 1.10 The States must use their Plan to focus on what is a priority and to deprioritise or remove actions from the GWP where the resource, funding, implementation requirements and benefits are not yet clearly identified.
- 1.11 The 2022 GWP identifies -
 - i. The remaining activity to move to living responsibly with COVID-19;
 - ii. The essential external work for the Bailiwick to secure its resilience and maintain its competitive economy as it manages the effects of Brexit,

1

moves to meet necessary international standards, and the response to external issues such as the Russian invasion of Ukraine;

- iii. The investment activity for this political term in the mechanisms to deliver government functions and maintain the Bailiwick's infrastructure; and
- iv. The phased recovery actions, now categorised as -
 - a. 2022 priority recovery actions in which to invest resource and funding for short and long-term benefits;
 - b. Other recovery actions for the coming 12-18 months which are resourced as far as possible, and which may be follow-on activity implementing previous actions, may result from previous decisions of the States, or may be new recommendations from Committees;
 - c. Recovery actions to commence within this political term which are scoped but capacity precludes earlier progress; and
 - d. Actions yet to be scoped, for which there is no resource at present and it is anticipated will commence in the next term. However the sponsoring Committee may scope the necessary work and submit to a future GWP update to accelerate the work, if competing demands and capacity permit and if the States support the next stage of the work.

1.12 Activity to support living responsibly with COVID-19 is drawing towards a close as pandemic response actions cease or are integrated into the normal business of providing health services. The Policy & Resources Committee therefore proposed revising the four prioritised work for the remainder of the term as two programmes of work, domestic and international.

1.13 The approach of the GWP supports the States of Deliberation manage the discharge of extant Resolutions and prioritise legislative drafting, which they coordinate with relevant new work to address current domestic and international opportunities and challenges.

1.14 The GWP is the closest yet that the States have come to achieving a costed and affordable plan in which all the significant actions of government are co-ordinated. The States are moving to a point where they will be managing their up-coming policy decisions and the implementation of all previous decisions annually, in a prioritised fashion, and with a report on progress against its priorities.

2 Introduction

2.1 Rule 23 of the Rules of Procedure of the States of Deliberation and their Committees requires an annual report and review of States' policy planning and its implementation which should include:

- commentary on progress and emerging issues;
 - identification of States' Resolutions which remain outstanding and updates from responsible Committees; and
 - a proposed order of priority for the drafting of significant items of legislation for the year ahead.
- 2.2 The first of this political term's annual GWP monitoring reports is attached at Appendix 1. The Policy & Resources Committee also publishes biannual reports in January. Additionally the Scrutiny Management Committee explores by public hearing the work of the Committees of the States in discharging the GWP as well as of the Policy & Resources Committee in co-ordinating the Plan.
- 2.3 An analysis of extant Resolutions (section 11) demonstrates the improving delivery of the decisions of the States. The order of priority being applied to the drafting of significant items of legislation for the year ahead (Appendix 2) completes the reporting requirements set out by the States.
- 2.4 Drawing on the information received from Committees and States' Members, and in its capacity to co-ordinate the work of the States, the Committee has phased actions in the GWP which will drive the States' response to current and emerging issues by investing in the Island's resilience. This has required that the other activity of the States is revisited in order to secure affordability and achievability of priority actions. This has been assisted by categorising the actions subject to their maturity.
- 2.5 The GWP must resource the more pressing recovery actions. These are the actions raised by Committees in the workshops undertaken earlier this year and on which the Committee has already sought the views of States' Members.
- 2.6 The published framework (Appendix 3) sets out actions for the remainder of this political term based on achievability, affordability and impact, as far as can be estimated based on available information. This has resulted in some actions being recategorised (changes are recorded in tables at Appendix 4). Subject to resource availability in Committees, these may be revisited this term.

3 Current Context

Policy pressures

- 3.1 The COVID-19 pandemic concentrated attention on individual and collective wellbeing, as illustrated by the consistent call to 'build back better' in almost every comparable jurisdiction. There is increasing interest globally in wellbeing frameworks and budgets to focus policy and investment decisions towards economically, socially, culturally, and environmentally sustainable outcomes.

The States have already established policies in these areas, such as the commitments to ensuring health outcomes and climate change impact are considered in all policy development.

- 3.2 The Bailiwick is now living responsibly with COVID-19 and responding to public health measures without emergency regulations. Some facilities are being stood down and staff are returning to their previous roles, but prevention measures and monitoring will have a sustained impact on the work of the Committee *for* Health & Social Care and the revenue budget.
- 3.3 The Island's housing needs and the increasing cost of living, are the two most pressing and immediate domestic pressures which the States must tackle. In addition the States must ensure that they learn from the pandemic experience and ensure their preparedness for the future with a determined focus on resilience and investing in Islanders' potential.
- 3.4 The extension of the post-Brexit Trade and Co-Operation Agreement has increased the level of compliance for Guernsey in respect of trade with other partners. Whilst this requires significant resource to support, it will support the Bailiwick's interests in the long-term.
- 3.5 Managing the impact of Brexit will be a sustained area of work for Committees across government throughout this political term, absorbing a diverse number of subject matter experts, policy officers and external advisors. The requirement for Guernsey to continue to meet international standards and norms across a number of areas is also a significant and ongoing workstream. These include evaluations by international bodies, which also require resources from both the States and other on-island agencies.
- 3.6 Economic and supply chain volatility in recent years has meant that the States need to redouble their efforts in order to maintain resilience across a number of critical areas – energy, transport connectivity, digital connectivity, infrastructure, skills and the workforce. The States have ownership and management of many of the Island's strategic assets, which makes them well-placed to meet these challenges, but they must ensure that planning and investment are long-term, that innovation is encouraged, and that they work collaboratively with other partners and other jurisdictions.
- 3.7 Global and national issues will continue to impact the Bailiwick, and the limited resources at the disposal of the States will necessarily be focused on these matters. The States are considering the implications of the Russian invasion of Ukraine, commencing a review of current government policies and how they apply to those who are seeking refuge. This is a significant workload.

Financial Context

- 3.8 The Funding & Investment Plan is an integral part of the GWP and sets out the financial planning framework within which the States will operate and resource. It considers all aspects of income and expenditure including business as usual, previous policy decisions and service developments, Brexit, COVID-19, recovery actions and capital investment.
- 3.9 The Funding & Investment Plan financial model has been updated considering the 2021 outturn, bringing all figures to 2022 prices, and incorporating the latest projections around the GWP initiatives (Appendix 8).
- 3.10 Overall, improvements have meant that there is now unlikely to be a need for any further external borrowing in this term to fund the capital portfolio. This has been driven in large part by the faster than expected recovery in 2021. However execution of the GWP as currently set out will result in the majority of the States' financial reserves being exhausted over the remainder of this term.

4 Government Work Plan 2021 Monitoring Report (full report at Appendix 1)

Priority 1 – Responding to the COVID-19 Pandemic

- 4.1 Over the last twelve months, the Bailiwick's response to the pandemic has continued to focus on proportionately mitigating the risks of COVID-19 for islanders, the community and the economy. This has been achieved through the delivery of a successful vaccination programme, maintaining a proactive testing strategy throughout the community, proportionate border restrictions and the continued promotion of public health measures. The Bailiwick has responded flexibly and often very swiftly to evolving circumstances, including temporarily increasing restrictions in response to emerging variants of concern and removing restrictions as quickly as possible as the risk profile decreased.
- 4.2 In line with the Bailiwick Blueprint, the Civil Contingencies Authority ceased to use emergency powers from 17th February 2022, bringing with it the end to legally mandated self-isolation for COVID-19 cases and cessation of border restrictions. This has seen the management of COVID-19 risks become business as usual. Commendably, the Bailiwick reached this position ahead of comparable jurisdictions. Priority 1 is now drawing to a natural point of cessation as pandemic response actions stop, subject to further waves or new Variants of Concern, or are integrated into the normal business of health.

Priority 2 – Managing the Effects of Brexit; Meet International Standards

- 4.3 The challenges and opportunities post-Brexit have continued to emerge, evolve and develop quickly, often beyond the States of Guernsey's control and alongside other geopolitical events (such as the Russian invasion of Ukraine). Along with the continued development of Guernsey's international identity and reputation, the Island requires a flexible approach to ensure that it can respond effectively for the benefit of the Bailiwick, using resources to best effect. This activity will continue to draw heavily on States' resources throughout this political term.
- 4.4 Significant progress has been made in the last 12 months on Guernsey's participation in UK trade agreements as the Island pursues opportunities that have arisen following Brexit. Access for trade in goods has been secured for the Bailiwick in UK agreements with *inter alia* the EEA EFTA, Japan, Australia, Singapore (digital) and New Zealand.
- 4.5 Work continues to implement changes to legislation, infrastructure, processes and procedures so that the Bailiwick can comply with the UK-EU Trade and Co-Operation Agreement (TCA) and the UK-Bailiwick Customs Arrangement.
- 4.6 A Channel Islands team has been established using existing resources to commence negotiations on the VAT Protocol with the EU. A timeframe and structure for the negotiations will need to be agreed during 2022. It remains of critical importance to Guernsey's international reputation that it continues to respond to changing international tax standards. Guernsey still plays an active role in the OECD work on Pillars 1 and 2, including participation in OECD technical meetings to develop model agreements, commentary, and detailed implementation plans. As more information emerges from the OECD, further work will be required to understand the full implications of the proposals and make recommendations on Guernsey's response.
- 4.7 Maintaining compliance with international standards on financial crime and regulation remains a priority. A critical focus for the next 12 months will be concluding preparations for the upcoming MONEYVAL assessment.
- 4.8 In June 2019 the States agreed to investigate and, if possible, negotiate a reciprocal health agreement with the UK Government. Despite some delays, primarily due to the impact of the COVID-19 pandemic, good progress has been made. Negotiations to finalise the detail are anticipated to conclude before the end of 2022, after which an implementation date will be confirmed.

Priority 3 – Delivering Recovery Actions

- 4.9 Every effort has been made to maintain resource levels to support the 2021 top ten recovery actions; progress actions already in train; and commence a carefully selected but limited number of new strategic reviews such as the Justice Review Framework and Primary Care Review.
- 4.10 Committees have also been able to make progress on the other work the States had phased for year one of the GWP, using their existing resources with funding provided and agreed through the Funding & Investment Plan and 2022 Budget. A summary of progress is set out in the monitoring report attached at Appendix 1.

Priority 4 – Reshaping Government

- 4.11 An important set of changes in how the States deliver services is being developed during this political term. This includes utilising technology, restructuring the public service and working more collaboratively with non-government partners.
- 4.12 The States have commissioned work to partners in the non-government sector across a number of areas of service delivery and continue to do so. For example this year the Committee for the Environment & Infrastructure has established a Nature Commission. This will create a partnership of government, the Guernsey Community Foundation and the significant expertise in the Island's voluntary sector to deliver the Strategy for Nature.
- 4.13 The States are now developing a consistent approach to commissioning which will enable greater collaboration with non-States partners to deliver services for the community. Working in partnership with expertise in the community will ensure services are more user-centric and focused on outcomes. The completion of an audit of commissioned services will enable further discussions on opportunities for this approach to be taken.
- 4.14 The States have undertaken a significant programme of public engagement as part of the tax review and have been exploring opportunities for operational savings. Independent analysis on corporate tax options has been commissioned to inform the decisions the States must make before the end of the year. The secondary pension proposals will also be considered by the States next month where they will be asked to appoint an on-island operator.
- 4.15 The terms of reference to review the machinery of government changes of 2016 have been published on gov.gg and proposals will be brought forward in 2023. The States have approved the new system that will usher in simultaneous electronic voting at States' Meetings. Next in this programme of work is a project to automate the electoral roll which will save recurring costs and importantly release staff resources as it is currently a resource-intensive process.

5 Government Work Plan 2022-2025: strategic aims

- 5.1 The Policy & Resources Committee is firmly of the view that the actions of government need to be focused and co-ordinated, ensuring that its limited resources are directed to deliver outcomes which:

Secure the Bailiwick's resilience:

- 5.2 Through recognising and responding to external opportunities and risks, by agreeing the Island's future population policy; by securing energy resilience; by taking steps to mitigate climate change; and by supporting critical infrastructure initiatives.

Maximise the community's collective potential:

- 5.3 Through addressing the barriers which may lead to avoidable, unfair and ultimately costly differences in islanders' experiences, opportunities and ability to participate in island life. This means taking a prioritised approach to social (including all forms of justice), cultural, political, economic, commercial and environmental factors which affect islanders, and which can cumulatively affect not only their individual health and wellbeing (the wider determinants of health) but the health, productivity and success of the community as a whole.
- 5.4 If targeted improvements can be made to the conditions in which islanders are born, grow, learn, live, work, and age, then over time it will unlock social and economic benefits. This includes considering the affordability, accessibility and quality of housing; supporting islanders' skills and development; improving living standards; and the accessibility, affordability and focus of public services.

Ensuring we are competitive as an economy:

- 5.5 Through enhanced connectivity, both digital and transport; and through increased productivity enabled by the development of skills and lifelong learning, enhanced participation in the workforce, and supporting migration where it enables those goals. In addition, we will continue to maximise the opportunities post-Brexit through trade agreements as well as meeting international standards and norms.

Engagement feedback from States' Members

- 5.6 A survey of States' Members resulted in 88% of respondents supporting or partly supporting the strategic direction seeking to build resilience to instil confidence in the Island for islanders and businesses. Where respondents were not in full support, reasons provided by more than one States Member included a preference for an overt economic focus over social or environment issues and a

concern over a lack of specific strategic aims.

- 5.7 The need to develop clearer strategic aims is acknowledged. The starting point for the GWP was to accept it would be more operational in nature initially, while we learned to live responsibly with COVID-19. It was developed to 're-set' how the States managed their business; to improve the alignment of human and financial resources across all areas of government's responsibility; to instil discipline in how and when Committees brought forward policies to the States; and to ensure that the States led the process by considering the Island needed.
- 5.8 The Committee believes that the discipline of the GWP will become an important tool in government cost control. It is the closest yet that the States has come to achieving a costed and affordable plan in which all the significant actions of government are co-ordinated. The States are moving to a point where they will be managing their up-coming policy decisions and the implementation of all previous decisions, annually, and in a prioritised fashion. This is the transitional political term but already the benefits are visible with a decreasing list of extant Resolutions and more achievable list of legislative drafting. The States are informed and able to consider and prioritise the resources required to conclude, implement and monitor the decisions they make. This means that the GWP can be an important tool to constrain the growth of government services and thereby support greater financial discipline across the Committees of the States and on behalf of taxpayers.

6 Government Work Plan 2022 – Refresh Principles

- 6.1 Conceived to organise work handed over by previous Assemblies, in the context of recovery from a pandemic and the impact of Brexit and addressing the work the new Assembly wished to deliver, the Policy & Resources Committee is assured that generally the top ten actions have been progressing well.
- 6.2 The limitations imposed by operating with constrained resource and funding when tackling both critical domestic issues and responding to global pressures have, however, led to frustrations in delivery of the wider GWP framework and some activity is unavoidably slower than is desirable. The Committees of the States must service their full mandate which is broader than just policy development and have had to prioritise their resources accordingly.
- 6.3 Neither are the States immune to the difficulties experienced in the wider economy with respect to staff recruitment and retention, with the reduction in working population and pressures on housing and the increasing cost of living. It is therefore even more important that the Committees of the States combine to focus their energies on the priority actions as directed by the Assembly.

Table 1: Action categories and recommendations

CATEGORY	DESCRIPTION	RECOMMENDATIONS	
		SUGGESTED RESOURCING	SUGGESTED PHASING
Category 1 – Priority Actions	Actions which have been identified as priorities for the 2022-2023 period and which need to be delivered to meet major challenges or take-up time sensitive opportunities.	Resource as a priority.	Phase 1: Start/continue in the 2022-2023 period
Category 2 – Actions in train	Actions which have started and have funding allocated (although not necessarily human resource).	Resource as far as possible considering priority actions.	Phase 1: Start/continue in the 2022-2023 period
Category 3 – Action scoped but not yet started	Actions where the work required for delivery has been scoped but which have not yet started	Consider for resource prioritisation in the context of higher category actions.	Phase 2: Commence within this term if/when possible.
Category 4 – Actions not yet scoped	Actions which have been identified but the work involved is not yet known.	No resource at present – sponsoring Committee may scope action further and submit to 2023 GWP refresh for resource allocation.	Phase 3: Do not commence this term. Consider for next term.
Category 5 – actions no longer required in the GWP	Actions which have been completed or superseded or which are no longer required.	No resourcing required.	No work will be undertaken.

6.4 The Committee believes that where time and money have been invested, that work should be completed unless there are evident reasons to the contrary. New work developing services or introducing legislation should be well understood and planned by the sponsoring Committee. It will be prioritised and resourced by the States after they evaluate competing recommendations annually from their Committees charged with advising on legislative, policy and service requirements that require a decision by the States.

6.5 The Policy & Resources Committee has now also applied a criteria (table 1) whereby generally if the action has not been scoped adequately it has not been prioritised or put forward to be considered for resourcing by the States. Policy development, new legislation and investment in service changes are no different

in this regard to capital investment, and instilling this discipline when resources are constrained would appear to the Committee to be the most appropriate approach at this time.

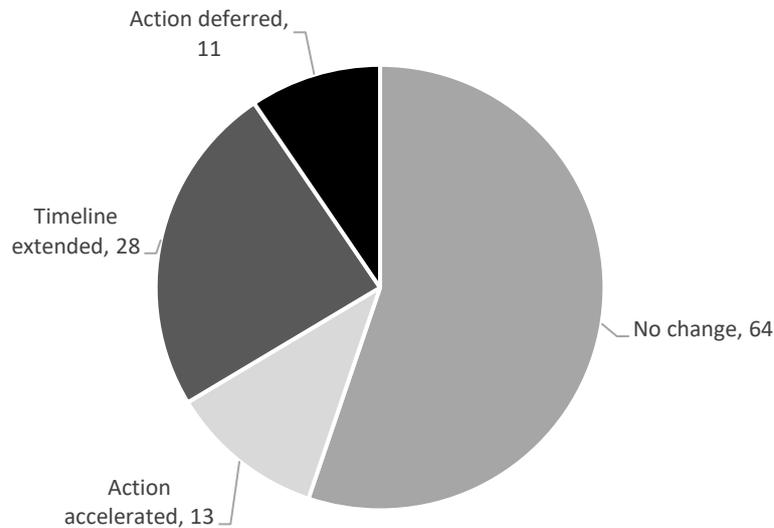

Engagement feedback from States' Members

- 6.6 The following principles were explored with States' Members:
- Completing to implementation the 2021 top ten actions;
 - Introducing appropriate priority actions; and
 - Re-phasing other actions to better match available resource within the current people and funding envelope, which may include making recommendations for some actions to be deferred until the next political term.
- 6.7 82% of respondents supported or partly supported these principles. Where respondents were not in full support, some States' Members suggested that the current resource envelope was not sufficient whilst others indicated that the 2021 actions did not represent their ideal starting point.
- 6.8 The Committee agrees that there are resource limitations in all areas of government which is why annually the States have to direct their Committees on the most important actions and instruct them to resource them as a priority.
- 6.9 Some respondents to the survey indicated that the 2021 top ten actions did not represent their ideal starting point, however the Committee notes that they were carried by 35 votes by the Assembly. Those not yet completed are on track to be considered by the States this year, and therefore the Committee does not, on balance, believe now is the time to divert.

7 Government Work Plan 2022 – Committee Priorities

- 7.1 The Committee has led on actively seeking the views of Committees through officer-facilitated workshops in Q1 of this year. The Committees of the States have advised their priorities to support their service delivery; meet the States' strategic outcomes; and discharge the previous directions of the States as set out by Resolution (Appendix 5). In the majority of cases, where work is not complete, these remain those set out in the GWP 2021 framework, with some amendment to timeframes. The Committee provides some observations at Appendix 6 to assist the States consider the context of this work.

Chart 1: Active 2021 actions – phasing changes

7.2 Many Committees are impacted operationally by the pressure on the housing market and without doubt it is equally impacting both the community and the economy. The Policy & Resources Committee considers the supply of housing to be the most pressing domestic issue.

7.3 In spring 2021 the Housing Action Group (HAG) was established for 12 months (until June 2022) in order to provide critical housing issues with greater focus, impetus and delivery co-ordination. The work of HAG has helped to catalyse or deliver a number of positive outcomes at an accelerated pace, including:

- The purchase of the Kenilworth Vinery site;
- Identification of land for new development and in-fill development;
- Identification of the current pipeline of development and the barriers to some of those development projects;
- Acceleration of Guernsey Housing Association (GHA) schemes to support social housing; and
- The identification and prioritisation of the next stages of work that are needed.

7.4 In addition to this, the Committee *for* Employment & Social Security and the Policy & Resources Committee have continued to progress work exploring options for the States on the transfer of the States of Guernsey’s social housing stock to the GHA.

7.5 The work on housing matters that will be undertaken during the remainder of the political term is:

- Market intervention project (including partial ownership schemes) – currently in start-up phase, the Committee *for the Environment & Infrastructure* will lead on implementation of approved schemes or where needed will seek States’ approval through 2022-23, working with others where mandates are engaged;
- States Strategic Housing Indicator – work on policy letter for later in 2022 and implementation of the States’ Resolutions; the lead is Committee *for the Environment & Infrastructure*;
- Potential transfer of States social housing stock to the GHA – ongoing through Committee *for Employment & Social Security* with the Policy & Resources Committee;
- Implementation of the General Housing Law in respect of housing standards through to 2024; the lead is Committee *for the Environment & Infrastructure*.
- Affordable housing development programme (including the ongoing work in the implementation of the affordable housing indicator) – ongoing work led by the Committee *for Employment & Social Security*, supported by the Policy & Resources Committee, and delivered by the GHA;
- Key worker housing – specific work, in addition to the other activity within the housing workstream that increases housing provision, which commences in early 2023 with the aim of having a report and recommendations to States in Q4 2023; the lead is Committee *for the Environment & Infrastructure*; and
- Review of accommodation for use in emergency circumstances – to be completed in 2023 for implementation of recommendations from 2024; the lead is the Committee *for Employment & Social Security*.

7.6 The Policy & Resources Committee has consistently allocated additional resource to housing matters and continues to do so. While the timescales are challenging, the Committee’s view is that if additional resource is needed to keep on schedule, this should be redeployed from other areas given the political and community acknowledgment that this is the Island’s main domestic priority.

7.7 Notwithstanding, the Committee agrees that this work must be phased due to resource limitations. It also needs to be phased in order to respond to, and be developed alongside, other areas of work, such as the Population and Immigration Review and the Skills and Human Capital Development Plan.

8 The Assembly's priorities for the next twelve months

- 8.1 In the past 12 months, immediate investment in the finance sector has been delivered, as were significant decisions to invest in digital connectivity to secure Island-wide ubiquitous provision within five years and invest in the re-organisation of secondary and post-16 education. The digital infrastructure programme is in delivery through the States' critical network infrastructure partner. The education programme has just recently confirmed an extension to its delivery timeframe in response to risks to the programme impacting students. Both programmes of work are monitored and reported through the Delivery Portfolio and the specific actions are now closed within the definition of the GWP 2021 top ten actions.
- 8.2 With an air policy framework agreed and guiding further work by the States, and with discussions ongoing with Condor, the Ports of Jersey and the Government of Jersey on a long-term operating agreement, the associated ro-ro licensing legislation being prepared, and the States to receive a business case from the Committee *for* Economic Development considering the proposals to extend the Guernsey airport runway, the Policy & Resources Committee considers transport connectivity and infrastructure policy has been developed, agreed and is now being implemented to such an extent that the focus of the Assembly's Plan for the next twelve months can be refreshed.
- 8.3 The States must take a prioritised approach to social, cultural, political, economic, commercial and environmental factors which impact islanders but the health, productivity and success of the community and economy as a whole.
- 8.4 This means that a continued focus on housing, the conclusion of policy determination on population and immigration, and investment in skills all remain urgent. A determined emphasis now on energy security, climate change mitigation and adaptations, and the wider determinants of health such as living standards will provide the foundations for a thriving and sustainable community and economy.
- 8.5 Having considered the advice of the Committees of the States and consulted States' Members, and in its capacity to co-ordinate the work of the States, the Policy & Resources Committee must advise the States to consider a number of factors as they decide their priority actions for 2022. This includes progress to date: resource capacity; current income and expenditure; local and global context; and acknowledge that decisions have yet to be made to secure the future levels of income necessary for the States to maintain current services and infrastructure investment.

8.6 Most important to the community, industry and government is the provision of accommodation that meets the needs of islanders. The Committee is bringing its resource and focus to bear on this critical issue and will assist the Committee *for the Environment & Infrastructure* in its efforts to stimulate the market and the Committee *for Employment & Social Security* as it works to secure the range of suitable tenure properties for social needs.

8.7 The States are invited to agree their priority actions from the maximum that can reasonably be delivered in the coming year as set out in the Propositions and in Appendix 7.

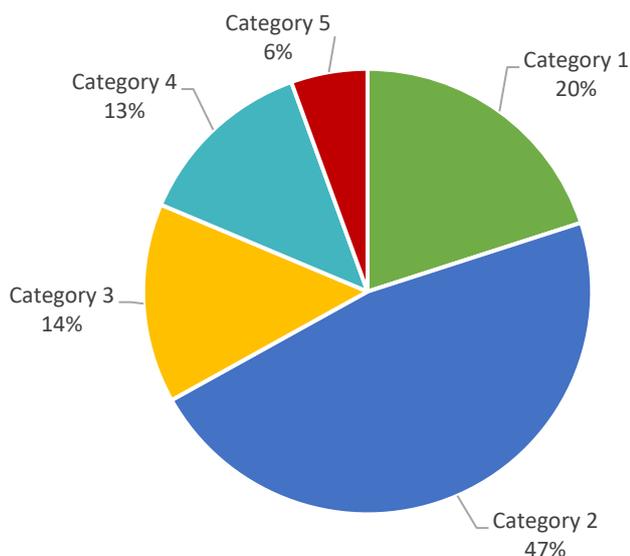

9 Phasing remaining work for this political term

9.1 The Policy & Resources Committee is optimistic that, subject to future Variants of Concern successfully being managed by the vaccination programme, States resources can increasingly return to planned business of government.

9.2 The Committee has taken the opportunity of the first refresh of the GWP and a faster than forecast economic bounce back to consider carefully how to move forward given the future funding of the current level of government services remains undetermined.

9.3 The Committee intends that its new categorisation of actions in the framework will assist in transparently presenting to the community what is being worked on and what has been identified for the future, subject to resource and funding requirements, and the costs and benefits, of the potential proposals.

Chart 2: Distribution of action between categories in GWP 2022

- 9.4 There remains a lot of active work, as illustrated in chart 2, which is to be expected but when considered against the reducing volumes of extant Resolutions and drafting requirements, this suggests an improving picture moving forward as an increasingly efficient government. Data collated annually for the longer-term impact monitoring will, in time, provide an indicator of effectiveness.

10 Funding the Priorities – Funding & Investment Plan Update

- 10.1 Following a strong financial performance in 2021 and changes to priorities and actions in the GWP, the Funding & Investment Plan has been updated (Appendix 8). This is a high-level interim update on the five-year financial framework.
- 10.2 The income and expenditure position for 2021 was some £61m better than the estimates included in the Funding & Investment Plan. This, together with a slower rate of investment in infrastructure throughout 2021, meant the balance on the General Reserve was significantly higher than expected throughout the year. Therefore, with higher than anticipated investment returns, this has resulted in an improvement in investment income of approximately £28m which can be added to the overall result.
- 10.3 Together these factors have significantly improved the balance on reserves and uplifted the baseline position for some revenues, notably income tax. Given this improved position, the cumulative projections for 2022 to 2025 have improved by circa £68m. This is due to improvement to income and investment return forecasts, partly offset by forecast increases in expenditure on GWP actions and lower levels of savings overall due to delays in their delivery. This improvement has also been offset by an estimated increased cost of capital and transformation programmes totalling £13m.
- 10.4 Overall, the improvements mean that there is now unlikely to be a need for any new external borrowing in this term to fund the capital portfolio. This is an excellent result which has been driven in large part by the faster recovery in 2021. However, execution of the GWP will still result in the majority of the States' financial reserves being exhausted over the remainder of this term.
- 10.5 The revised projections indicate a surplus before capital expenditure over the Plan period which will fall from £25m in 2022 to £5m by 2025. The shrinking surplus comes about because of the demand pressures on public service expenditure, particularly in relation to health and care services, coupled with strain on revenues as a result of a reduction in the working population and the introduction of secondary pensions.
- 10.6 These small surpluses are not sufficient to fund the necessary investment in island infrastructure. They are too small even to fund the everyday replacement

of equipment and vehicles, renewal of roads and investment in property assets, classed as Minor Capital.

- 10.7 The underlying position remains a structural deficit beyond this term which, for General Revenue, is estimated to be approximately £50m when the long-term infrastructure funding needs are factored in. In addition, the States are running a deficit on the social security schemes, in particular the States' pension, which have a long-term funding requirement of £34m a year. Therefore, the overall structural deficit remains in line with previous forecasts of £80-90m.
- 10.8 The investment return on the reserves supports capital investment and makes the Plan affordable without any new borrowing in this term. However, the level of return can be volatile (as seen by the movement in investment markets in the first quarter of 2022) and cannot be relied on to support future expenditure since the reserves are being spent to support delivery of this Plan.

11 Discharge of extant States' Resolutions & legislative drafting prioritisation

Extant States' Resolutions

- 11.1 As reported in the 2021 GWP there were 405 extant States' Resolutions with the expectation that at least 100 were likely to be discharged through the delivery of the actions in the GWP going forward. The States also resolved to rescind a small number which were either superseded or no longer valid.
- 11.2 The recent GWP refresh process further updated the scope of the government's workload in terms of its extant Resolutions. This is an important element to understanding the priority Committees place on discharging Resolutions and their capacity to do so alongside new areas of policy and service development they wish to explore, especially within the current context of stretched financial and human resources.
- 11.3 An additional 100 Resolutions resulted from States' Meetings between July 2021 and April 2022, and with 367 extant Resolutions as at the end of April 2022, the total number has reduced by 131 over this time period. This demonstrates the importance of targeted resourcing.
- 11.4 The refresh process also identified 11 Resolutions that are proposed for rescission as generally they have been superseded by subsequent decisions. A full list of Resolutions proposed for rescission is at Appendix 9.
- 11.5 If these proposed rescissions are agreed by the States, the total number of extant Resolutions will be 356, with the majority of these to be discharged by GWP-related actions as shown in the table 2 below.

Table 2: Extant Resolutions status summary

Number of Resolutions as at July 2021	405	
Number of Resolutions rescinded in 2021 GWP policy letter	12 (5 were then replaced)	
New Resolutions between July 2021 – April 2022	100	
Resolutions discharged between July 2021 – April 2022	131	
Rescissions proposed in 2022 GWP	11	
Resolutions phased in 2022-25 GWP	258	
Resolutions not prioritised (by year below)	109	
	2022	3
	2021	36
	2020	23
	2019	7
	2018	10
	2017	3
	2016	9
	2015	7
	2014	3
	2012	1
	2011	3
	2007	1
	2006	2
	2003	1

Legislative drafting

- 11.6 Since June 2021 there has been significant progress in respect of outstanding Resolutions of the States mandating the preparation of legislation. Just in the area of financial services and regulation, drafts have been prepared for a new Lending, Credit and Finance Law, as well as legislation providing for limited liability companies and the use of money in dormant bank accounts; important amendments to competition legislation have gone out for consultation; and the final Ordinances of the comprehensive law revision project relating to the regulation of financial services have been enacted.
- 11.7 Legislation has continued to be drafted for bodies other than the States, primarily the States of Alderney and the Chief Pleas of Sark (including the introduction of legislation regulating partnerships and limited partnerships in Alderney, and land reform and compulsory purchase legislation in Sark) and also other public bodies such as the Alderney Gambling Control Commission. The small team of legislation drafters at St. James’s Chambers continues to balance

the demands of the States effectively with the demands of the other Bailiwick legislatures and bodies that it serves. The list of completed legislative drafting since June 2021 is in Appendix 10.

- 11.8 The introduction of the GWP has had several positive impacts on the progress of legislative drafting for the States. It has added rigour and simplicity to the prioritisation process for the drafting of legislation, making it simpler to make and justify prioritisation decisions by reference to the Plan, and making it easier to assess when to treat a new Resolution as high or medium priority before its formal consideration by the Prioritisation of Legislation Working Group and the Policy & Resources Committee.
- 11.9 The GWP has facilitated more targeted additional policy officer support to Committees in areas where it is most needed to facilitate the finalisation of draft legislation. Drafting legislation is typically an iterative process involving multiple exchanges between officer and drafter. It is not widely appreciated that the pace of drafting of legislation in Guernsey relies heavily on the capacity in Committees to prepare instructions on points raised by the drafter or provide comments in a timely fashion on draft provisions. The focus on GWP priorities in the preparation of legislation, and the ongoing dialogue between St. James's Chambers and officers working to the Policy & Resources Committee, have allowed resources to be provided to support these matters more swiftly than might otherwise have been the case and so more efficiently finalise the legislation drafts.
- 11.10 As has been the case for many areas of government, including from the perspective of drafting, the broader requirements of the GWP have had to be balanced since its introduction with the more immediate drafting and advisory demands of the States' response to the COVID-19 pandemic. In anticipation that those demands are now largely passed, going forward there can be a renewed focus on agreed strategic priorities, while recognising that unexpected, urgent work is always a possibility and must be catered for (as the invasion of Ukraine and the subsequent drafting of new sanctions provisions has shown).
- 11.11 Drafting pressures to be accommodated in the next 12 to 18 months include the preparation of the remaining legislation needed for the Bailiwick's audit by MONEYVAL and provisions required for the implementation of new post-Brexit trade arrangements. The full list of prioritised legislation is set out in Appendix 2.

12 Compliance with Rule 4

- 12.1 Rule 4 of the Rules of Procedure of the States of Deliberation and their Committees sets out the information which must be included in, or appended to, motions laid before the States.
- 12.2 In accordance with Rule 4(1):

- a) The Propositions contribute to the States' objectives and policy plans by discharging the policy planning requirement set out in Rule 23 of The Rules of Procedure of the States of Deliberation and their Committees.
- b) In preparing the Propositions, consultation has been undertaken with all Principal Committees and all States' Members.
- c) The Propositions have been submitted to Her Majesty's Procureur for advice on any legal or constitutional implications.
- d) The financial implications to the States of carrying the proposal into effect are detailed within the body of the Policy Letter and at Appendix 8.

12.3 In accordance with Rule 4(2):

- a) The Propositions relate to the Committee's mandate to co-ordinate the States' strategic planning process.
- b) The Policy & Resources Committee, pursuant to its mandate to coordinate the work and priorities of the States of Deliberation, unanimously puts forward the top recovery actions as representing those priorities presented to it by States Members and Committees in the development of the refreshed Government Work Plan 2022. The Committee, however is not unanimous in its agreement that all the actions listed in category one should be priority recovery actions when compared to other pressing issues and priorities, and as such this should not be seen as priority recovery actions of the Policy & Resources Committee.

Yours faithfully

GOVERNMENT WORK PLAN

MONITORING REPORT

July 2021- May 2022

INVESTING IN ISLANDERS, OUR ISLAND AND OUR FUTURE

WHAT IS THE GOVERNMENT WORK PLAN?

The Government Work Plan, or GWP, is the framework that sets out the prioritised work for this political term (2021 - 2025), linking it to the resources available both in terms of funding and people. It is a living document and refreshed annually every June so the States of Guernsey, as Guernsey's Government, can respond to changing circumstances and external pressures. This monitoring report sets out what the States have achieved in the last 12 months.

DEVELOPMENT OF THE GOVERNMENT WORK PLAN

After the 2020 election, the Policy & Resources Committee took a fresh look at its mandated responsibilities regarding facilitation, leadership, monitoring and reporting of the States' policy planning and reporting process. The States' intentions had out-stripped their financial and human resources, even before COVID-19 and Brexit's impact had taken their toll. The result had been a list of policy initiatives, capital projects and extant Resolutions that could not all progress in a timely manner, combined with a trend of underinvestment in critical infrastructure. The States agreed that what was needed was a single, integrated, phased and funded Government Work Plan to address the Island's immediate economic, social and environmental needs and position islanders for a thriving, sustainable future.

In March 2021, the Assembly agreed the Plan's four main priority areas: COVID-19, Brexit, Recovery and Reshaping Government. A Sub-Committee then went on to consider a provisional prioritised framework of recovery actions which the Policy & Resources Committee developed into the Government Work Plan. The GWP was approved by the Assembly in July 2021. It now assists the States in making sure they use funds and people for maximum impact. Importantly, it sets out an annual list of priority recovery actions which will evolve over the political term as each action is successfully concluded and the Assembly determines the next most critical actions for its attention.

In 2021 the States agreed four main priority areas:

RESPONDING TO THE COVID-19 PANDEMIC

RE-SHAPING GOVERNMENT

MANAGING THE EFFECTS OF BREXIT AND MEETING INTERNATIONAL STANDARDS

DELIVERING RECOVERY ACTIONS

PRIORITY 1 RESPONDING TO THE COVID-19 PANDEMIC

WORK STREAMS	AREAS OF FOCUS	PRIORITY
Deliver the vaccine programme	Mitigate current COVID-19 risks	Responding to the COVID-19 pandemic
Deliver the Bailiwick testing strategy		
Provide business support	Manage future COVID-19 risks as part of a new normal	
Live responsibly with COVID-19		

Over the last twelve months, the Bailiwick's response to the pandemic has continued to focus on proportionately mitigating the risks of COVID-19 for islanders, the community and the economy. This has been achieved through the delivery of a successful vaccination programme, maintaining a proactive testing strategy throughout the community, proportionate border restrictions and the continued promotion of public health measures. The Bailiwick has responded flexibly and often very swiftly to evolving circumstances, including temporarily increasing restrictions in response to emerging variants of concern and removing restrictions as quickly as possible as the risk profile decreased.

Financial support for affected businesses continued but has been prioritised, with the Payroll Co-Funding Scheme closing at the end of September 2021 as normality gradually resumed. The tourism and hospitality sector, which was particularly affected by border restrictions on and off-island, benefited from specific schemes in respect of Visitor Accommodation and Visitor Attractions, which continued until the end of March 2022. Financial support to businesses in 2021 totalled £22.4 million, the majority of which related to the second lockdown period that stated in January 2021. In line with the Bailiwick Blueprint, the Civil Contingencies Authority ceased to use emergency powers from 17th February 2022, bringing with it the end to legally mandated

self-isolation for COVID-19 cases and cessation of border restrictions. This has seen the management of COVID-19 risks become business as usual. Commendably, the Bailiwick reached this position ahead of most other jurisdictions, and was the first place in the British Isles to do so.

However, the global pandemic continues and while specific legislative interventions for COVID-19 have been replaced with public health measures and guidance, the States continue actively to monitor the situation and plan for future unknown scenarios. This includes the potential emergence of Variants of Concern that render the vaccine less effective or which cause more severe disease. Guernsey's vaccination drive has been one of the fastest and most successful vaccination programmes in the world.

A responsive risk-based testing strategy has now been developed with the ability to 'step-up' or 'step-down' the Bailiwick's response. This is based on treating COVID-19 in a similar way to other existing respiratory illnesses, through encouraging personal and community responsibility using positive public

health messages. Individuals, community groups and businesses will be supported to make informed decisions on the management of risks of COVID-19 but with targeted support and guidance available from government in respect of high-risk outbreaks or cases.

Responding to COVID-19 has been a challenge and as the Bailiwick emerges from this difficult time, it provides opportunity to consider future preparedness and resilience. The response to the pandemic has had an impact across government and the community. While no-one has been immune from the effects of the pandemic, some islanders have been disproportionately affected, for example children and young people, and there is a need to provide focused support. Learning lessons from the Bailiwick's response to date may highlight the benefit of other legislative changes or influence the progression of policy workstreams not currently prioritised in the GWP.

PRIORITY 2 MANAGING THE EFFECTS OF BREXIT; MEET INTERNATIONAL STANDARDS

WORK STREAMS	AREAS OF FOCUS	PRIORITY
<ul style="list-style-type: none"> Enhance the Bailiwick's constitutional resilience Ensure compliance with agreed international agreements/standards Seek opportunities for new beneficial arrangements Ensure customs agreement compliance 	International Agreements and Conventions	Managing the effects of BREXIT; meeting international standards
<ul style="list-style-type: none"> Respond to and assist in shaping international tax standards Continue to meet economic substance requirements Meet the political commitments made to the EU in respect of assistance in collection of certain taxes Ensure ongoing alignment with the UK-EU Trade and Cooperation agreement (TCA) Implement Common Reporting Standards (CRS)/CRS v2 	Substance, Taxation and Reporting	

WORK STREAMS	AREAS OF FOCUS	PRIORITY
Implement required operational border infrastructure	Borders	Managing the effects of BREXIT; meeting international standards
Implement required customs and excise structure		
Ensure capacity and project support for border-related requirements		
GEMS development to achieve compliance with UK-EU Trade and Cooperation Agreement and new FTAs		
Implement required immigration and nationality service structure		
Maintain trade in goods	Trade Arrangements	
Maintain trade in services		
Maintain intellectual property protections		
Ensure compliance at the border with Trade and Cooperation Agreement (TCA) legislation		

The challenges and opportunities post-Brexit have continued to develop quickly, often beyond the States' control and alongside other geopolitical events (such as the current war in Ukraine). Along with the continued development of Guernsey's international identity and reputation, the Island requires a flexible approach to ensure that it can respond effectively for the benefit of the Bailiwick, using resources to best effect. This activity

will continue to draw heavily on States' resources throughout this political term.

Trade Agreements

Significant progress has been made in the last 12 months on Guernsey's participation in UK trade agreements as the Island pursues opportunities that have arisen following Brexit. In September 2021 the States decided the process and

approach to Guernsey's participation in UK trade arrangements with other jurisdictions. Relationships with key stakeholders have been strengthened, within and outside the Bailiwick, to assist in setting trade policy and identifying opportunities for Guernsey's participation in such agreements where relevant, proportionate and practical (and for Alderney and Sark where appropriate).

Access for trade in goods has been secured for the Bailiwick in UK agreements with the EEA EFTA, Japan, Australia, Singapore (digital) and New Zealand. The focus for the coming months will be evaluating the potential benefits of Guernsey participating (with the UK) in the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP), in addition to other agreements including those with the Gulf Cooperation Council and major economies such as India, Canada and Mexico.

Borders

Work continues to implement changes to legislation, infrastructure, processes and procedures so that the Bailiwick can comply with the UK-EU Trade and Co-Operation Agreement (TCA) and the UK-Bailiwick Customs Arrangement. This has included changes at the ports, such

as installing new customs infrastructure and IT, and increased staffing to deliver additional requirements post-Brexit. Engagement with local business has ensured that trade continues to flow between the Islands and trading partners. There is still a significant amount of work to do to ensure that pragmatic and proportionate legislation, systems and processes are in place. It will also be necessary to continue to monitor and identify any further changes that may be needed due to any new trade related agreements or amendments to existing agreements.

Substance, Taxation and Reporting

The Bailiwick made political commitments, alongside the UK-EU TCA about cooperation with the EU on administrative assistance for certain taxes (referred to as a 'VAT Protocol'). This builds on Guernsey's long-established position as a cooperative jurisdiction for taxation. A Channel Islands team has been established to commence negotiations on the VAT Protocol with the EU. A timeframe and structure for the negotiations will need to be agreed during 2022.

It remains of critical importance to Guernsey's international reputation that it continues to respond to changing international tax standards. Guernsey plays an active role in the OECD work on Pillars 1 and 2, including participation in OECD technical meetings to develop model agreements, commentary and detailed implementation plans. As more information emerges from the OECD, further work will be required to understand the full implications of the proposals and make recommendations on Guernsey's response.

International Agreements and Conventions

Work continues to protect Guernsey's constitutional position and seek greater autonomy in international affairs, including:

- Discussions with the Ministry of Justice to seek modifications to the Bailiwick's legislative process, which is hoped to be achieved in 2022; and
- Negotiating and agreeing various tax agreements and a social security agreement (with Latvia).

Maintaining compliance with international standards on financial crime and regulation remains a priority. A critical focus for the next 12 months will be concluding preparations for the upcoming MONEVAL assessment in 2023.

Other beneficial agreements

In June 2019 the States agreed to investigate and, if possible, negotiate a reciprocal health agreement with the UK Government. Despite some delays, primarily due to the impact of the COVID-19 pandemic, good progress has been made in discussions with the UK Government. Negotiations to finalise the detail are happening and are anticipated to conclude before the end of 2022. The implementation date is not yet confirmed.

PRIORITY 3 DELIVERING RECOVERY ACTIONS

WORK STREAMS	AREAS OF FOCUS	PRIORITY
<ul style="list-style-type: none"> Invest in the finance sector Accelerate the digital economy Unlock enterprise Invest in the visitor economy Invest in nature and the natural economy 	Sustainable Economic Recovery	Delivering Recovery Actions
<ul style="list-style-type: none"> Enable opportunities for regeneration Secure future energy requirements Secure transport connectivity and infrastructure 	Connectivity and Infrastructure	
<ul style="list-style-type: none"> Promote education, skills and learning Meet housing needs Keep the Island safe and secure Promote responsive population measures Support healthy living Enable accessible and affordable 21st century health and care services 	Community Investment	

TOP TEN RECOVERY ACTIONS

Ten recovery actions were agreed in 2021 as being of primary importance in addressing the Plan's focus: 'Investing in Islanders, our Island and our Future'.

Housing - scope and deliver urgent measures necessary to address housing pressures

The following has been achieved;

- The purchase of the Kenilworth Vinery site;
- Identification of land for new development and in-fill development;
- Identification of the current pipeline of development and the barriers to some of those development projects;
- Acceleration of Guernsey Housing Association schemes to support social housing.

In addition to this, an assessment on the options to transfer States of Guernsey's affordable housing stock to the Guernsey Housing Association is on-going.

Education - commence the re-organisation of secondary and post-16 education pressures

The States reached a decision on the re-organisation of secondary education and post-16 provision in 2021 and as such this work is no longer a top ten action. In February 2022, the Committee for Education, Sport & Culture took the decision to delay the final handover date by up to a year after fully examining all

available options to overcome challenges that are largely outside its control. The greatest concern was to ensure that learners and the school communities were not disrupted by changing plans for their transition to different schools which was a significant potential risk from construction delays.

Skills - set out and resource proposals to grow knowledge and skills in our community

A plan will be published in Q3 2022 to invest in the potential of islanders, with work underway to establish clear data on the current skills gap in the Island as well as the future skills gap in relation to the economy.

A pilot to improve adult literacy and numeracy has also been commissioned, and work is continuing to explore the potential for a skills hub. In addition,

consultation with private and non-government sector parties is about to begin.

This work is in part dependent on a review of our population and immigration system which is happening at the same time and which it will support by focusing on increasing productivity and enhancing workforce participation.

Digital infrastructure - determine and begin implementation of the approach to enhanced digital infrastructure

The Digital Infrastructure project is an ambitious programme of work to provide a universal fibre broadband network across the Island to increase broadband speeds. The contract has been awarded and the implementation and roll-out has commenced.

During the pilot phase nearly 2,000 homes were made ready for fibre and as at April 2022 some 200 of these are already connected to the network. The next stage will accelerate the roll-out with 700 homes every month connected to the new network with the roll-out and connection of 100% of Guernsey premises (including 30,000 homes) due for completion in March 2027.

The community will be able to track progress online of the phased roll-out. The increased percentage of households and premises connected to broadband by fibre will contribute to accelerating the digital economy.

Meanwhile work will continue on establishing a licensing framework for a 5G mobile network and to develop skills and pathways, and support innovation, transformation, and entrepreneurial growth in the digital industry.

Children - support vulnerable children through revision to the Children Law and action on the Outcomes Report

Amendments are being developed to the Children Law to reduce delays in determining positive outcomes for children and young people. All interested parties are involved in this work. It was

originally hoped that changes could be agreed by the end of the second quarter of 2022, but this is now expected in the next quarter of this year.

Population - assess the fitness for purpose of our population and immigration framework while recognising the need to balance economic needs with maintaining quality of life

The review is progressing on time and on budget. Work includes considering the challenges that are being faced by the economy today, what the Island's future population policy needs are, and what can be done in the short to medium-term. In addition, it is considering how, post-Brexit, the immigration and population approaches and processes need to be aligned and seeks to enhance the economic benefit of the Open Market.

An agreement in principle has also been made to recommend the introduction of a new Open Market residency policy, in which an older resident who has lived here for 14+ years can move to the Local

Market if they forfeit an inscription for an open market property.

Consideration is also being given to discontinue the Population Employment Advisory Panel, with the information required by the States to manage their population policies achieved through the Committee for Economic Development.

Proposals should be considered by the States in the third quarter of 2022 ahead of the debates on housing, tax and skills policies, all of which are highly interdependent.

Finance and Tourism - invest additional funding into promoting Guernsey's finance sector and establish a tourism plan and campaign to expand Guernsey's tourism offer

Against a backdrop of increasing competition, the States agreed additional funding to invest in Guernsey's major economic industry, the finance sector, for the next three years.

The 2022 tourism campaign is active, and work on a plan for development of the tourism sector will conclude this year. The

strategic economic focus will now move from tourism and direct support of the finance sector to other enabling activity to support the Island's competitive position and development of new opportunities.

Transport - set out a clear and co-ordinated transport connectivity and infrastructure policy and further develop the general and commercial aviation sector

A report on a possible runway extension is being finalised, and a land use and infrastructure masterplan is being developed for the airport. Further work is being undertaken on how the general and commercial aviation sector can be developed.

Discussions continue with Condor, the Ports of Jersey and the Government of Jersey on a long-term operating agreement, and associated ro-ro licensing legislation is being prepared. In addition, work is ongoing to assess what support can be given to investment in the ferry fleet. The air policy framework is now in place and agreed actions arising from it are being taken forward, such as the development of a route development strategy.

Regeneration - establish a Development Agency and enable work to begin on the development of the seafront masterplan

The structure for a new Development Agency has been agreed; a political steering group has been established which will provide oversight; and discussions are taking place on the next steps in relation to Guernsey's future harbour requirements and the land management transfer policy and delegation. The role of Chair of the

Development Agency will shortly be recruited through an open process. The Chair will then work with the political steering group on the formation of the executive and the open and transparent recruitment of the Development Agency Board.

All of the Development Frameworks for regeneration areas are now complete.

Health Recovery - support the physical and mental recovery of Islanders through scoping and delivering SOHWELL phase 3 programme and launching the pilot wellbeing centre jointly with third sector partners

Health recovery is another critical response to our wellbeing as we navigate living responsibly with COVID-19. Additional wellbeing support was provided over the 2021 festive season for individuals experiencing low to moderate stress, distress and isolation, recognising that it can be a difficult time of year, even without the relentless COVID headlines at the time. The partnership approach with the third sector will also be explored for the provision of an out-of-hours 'drop in' crisis support on a pilot basis.

The key elements of Phase 3 of the Supporting Occupational Health and Wellbeing initiative have been identified to build on vocational rehabilitation and occupational health services to transform the way in which short and long-term sickness is managed and to reduce the rising trend in long-term incapacity. The next stage will be developed through working with interested parties.

Sustainable economic recovery

Plans are being scoped to develop on-island entrepreneurship with a framework of actions to be set out during 2022. Considerable co-ordinated effort is being applied to support emerging economic opportunities such as the pharmaceutical industry with its foundation in medicinal cannabis, with the first licence issued in November 2021 under the recently agreed Memorandum of Understanding with the UK.

Work on supporting and enabling innovation in FinTech continues, and a new tourism product development plan is being developed which incorporates heritage, arts, sport, and sustainability. Planning has started for the first steps

in the development of the blue and green economy to support the wider ambitions for a robust economy founded on sustainability principles which are increasingly important in attracting new business. The environmental pollution legislation is also being updated as part of the focus to invest in and protect the natural resources of the Island.

The Development Agency proposals were approved by the States in April 2022. It will support infrastructure investment, including in relation to the ports.

The Island's aggregate supply policy has also been agreed, bringing more certainty to the construction industry.

Connectivity and infrastructure

Agreement in principle has been reached to extend the Paris Agreement to the Island which puts a renewed focus on energy resilience and climate change mitigation and adaptation. The electricity strategy is in the process of being updated and will include separate supply, demand and market elements, in addition to the establishment of an energy partnership. A critical component of that will be the creation of a framework for developing on-island renewables.

The previous hold baggage system at Guernsey Airport did not meet regulatory compliance and had reached the end of its life. The completion of the Hold Baggage System Phase 1 Project has substantively dealt with this. The second phase was focused on providing extra resilience and expansion opportunities. Further work is required to determine the best time to start this phase, taking into account passenger demand, the prevailing economic environment and the future decisions of the States with respect to the Tourism Product Development Plan and the runway extension.

Community investment

The States will consider a justice framework in May 2022, and has funding identified to support some follow-on work.

A review of primary care services is also progressing and proposals will be put to the States later in the year. Any ongoing future revenue costs resulting from the recommendations will be additional costs to government.

The States are exploring the options for alternative and non-punitive approaches to the possession and use of small quantities of illegal drugs. This excludes any work on decriminalisation or legalisation of drugs at this stage in order to focus on non-punitive approaches and make any recommendations that may be necessary as soon as practicable. However at its meeting in June the States will be asked whether to direct work to explore the options for a review of the legal status of cannabis or develop proposals to explore a new Public Health Law as the next major area of health policy this term.

Important pieces of legislation to help Islanders have been progressed including the Lasting Powers of Attorney Ordinance under the Capacity Law and reforms to the Matrimonial Causes Law which

will be considered by the States shortly and should help families going through divorce. This latter work will assist with ongoing work to improve outcomes for children which was identified as a Top Ten action in 2021. In addition, the sexual offences legislation was passed (with further secondary legislation to come).

Key stakeholders have been consulted in respect of the draft Prevention of Discrimination Ordinance. Plans are in place to roll out free training and guidance materials well in advance of entry into force.

Work to identify the priority workstreams for strategic investment in continuous improvement in all phases of education is progressing and this provides a better understanding of the resource requirements for the period 2022-2025. This will address areas of development identified as a result of external inspection, improved school governance and quality assurance.

Good progress is being made on investment, resourcing and tendering approvals which are now underway for the Secondary and Post-16 facilities for a revised go live date of September 2025. There remain some concerns centred on construction, including

inflation and supply/demand; these are being monitored and managed. The final investment decision, prior to selecting the Les Ozouets Campus construction preferred bidder, is due for consideration by the Policy & Resources Committee in June 2022.

The Affordable Housing Programme is making good progress in bringing forward the funded schemes for affordable housing, in partnership with the Guernsey Housing Association. The development sites are currently at various stages in the process and subject to planning permission, contractors will be appointed.

The Princess Elizabeth Hospital Modernisation programme is underway, with the approvals to proceed and a contract now signed for Phase 1. This is for the first of three phases of the programme which includes additional facilities and Critical Care Units. The construction plan has now commenced, with contractors on site and work is underway. Phase 2 of the programme is also progressing well and it is anticipated that a planning application will be submitted for this future stage by the end of the year.

PRIORITY 4 RE-SHAPING GOVERNMENT

WORK STREAMS	AREAS OF FOCUS	PRIORITY
Enable the transformation of public services to meet 21st century requirements	New Ways of Working	Re-shaping Government
Establish commissioning infrastructure		
Sustain government finances	Long-Term Sustainability	
Define future Bailiwick relationships		
Secure necessary evidence base		
Maintain essential infrastructure and systems	Effective Government	
Enhance the operation of government		

Effective government

An important set of changes in how the States deliver services is being developed this political term as government is re-shaped in response to new technologies and changes in population that require new or changes to existing services.

The States are now developing a consistent approach to commissioning which will enable greater collaboration

with non-States partners to deliver services for the community. Working in partnership with expertise in the community will ensure services are more user-centric and focused on outcomes.

The States have undertaken a significant programme of public engagement as part of the Tax Review and have been exploring opportunities for operational savings. The Tax Review is exploring how

the States can raise more money and reduce costs to prevent a forecast annual position where it costs £85m more to run the services than is received through taxes and charges. The forecast deficit is based on the increased demand for essential services (such as healthcare and pensions) that will come from the Islands' changing population make-up, and reflects the services government currently provides or is already committed to. Unplanned additional cost pressures would require the forecast annual deficit to be revised, and will increase the need to increase revenues

or cut services elsewhere. This is why it is important that the States decide what work is most urgent and resource it through the GWP.

As part of this work independent analysis on corporate tax options has been commissioned to inform the decisions the States must make before the end of the year.

The secondary pension proposals will also be considered by the States next month where they will be asked to appoint an on-island operator.

The Terms of Reference to review the machinery of government changes of 2016 have been published on gov.gg with proposals being put forward in 2023. The States have approved the new system that will usher in simultaneous electronic voting in the Assembly. Next in this programme of work is a project to automate the electoral roll which will save recurring costs and importantly release capacity as it is currently a resource intensive process.

Implementation of a new service model and associated IT systems for the Revenue Service

The Revenue Service Transformation Programme has been in the implementation phase since May 2020. Since then, new working practices, management strategies and digital services have been introduced to improve the Revenue Service. This complex programme is on course to deliver valuable benefits for the States and their customers.

The Revenue Service has been the first major service to make use of the MyGov platform which has enabled the States to gain over 22,000 registered users, with 90% of those using the Revenue Service

digital services providing feedback that they would recommend the service. A total of 92% of survey respondents who have used the online Personal Tax Return have found the experience to be 'very good' or 'good'.

Work continues on the programme to progress IT developments and retire key legacy systems that are a critical risk to the operational effectiveness of the States' revenue collection. There has been some delay to the next stage of the programme due to the capacity of critical resources, resulting in a review of the timescale and approach for the next phases. This is being addressed and recovery actions put in place to ensure benefits will be secured within the revised timescale.

New Ways of Working - Enabling the transformation of public services to meet 21st century requirements

These programmes of investment are essential to the public service transformation agenda with the objective of building a more efficient and effective public service whilst continuously improving customer service experience.

The MyGov Programme includes several projects including the 'Customer Hub' to

deliver increased front facing customer services and a review of the service operating model for key strategic and enabling services. The delivery of the programme is planned with incremental change, starting with the first phases in Quarter 2 and Quarter 3 of this year. The new 'Customer Hub' will be located at Edward T Wheadon House, with services phased into the Hub during 2022.

The IT Transformation Programme continues and is in the latter stages of roll out of a programme to transform the States' IT infrastructure and devices (including end user computers and telephony infrastructure). Work continues to roll out the hosting services, security and further IT infrastructure. Two of the IT Transformation workstreams are substantially completed with three others in progress.

The Property Rationalisation Programme will provide more efficient, sustainable and effective use and repurposing of public building space, reducing the number of buildings required by public services. This has included the adoption of smarter rotational working practices and technology for improved collaborative working. Raymond Falla House has already been vacated and work is underway with the remaining properties in scope.

The Smart Court project has commenced the early stages of implementation and will provide a digital front office for the Courts. This will allow multiple engagements to happen digitally, with a corresponding back office for processing these elements. It will allow far safer and more cost-efficient storage of data, along with improved collation of that data and statistics to support government policy, particularly around criminal and social justice matters.

Maintain Essential Infrastructure and Systems

- A new Electronic Patient Record System will replace the existing end of life legacy system and provide enhanced continuation of patient records management. The whole programme is anticipated to be completed by Quarter 3, 2024.
- The current bus fleet needs a phased replacement of buses that have reached the end of life. There have been some complexities relating to the procurement of Phase 3 of the bus fleet replacement, which will incur some delay to commissioning. A bus fleet lease arrangement is currently being utilised to meet service requirements.

- The Joint Clinical and Animal Waste Solution project is actively sourcing a technical adviser to assist with finalising the detailed specifications for the different options under consideration, so that the most suitable option can be determined.
- Initial work has commenced to review the repair or replacement options for the Castle Emplacement Bridge. It is currently anticipated that construction will commence in 2023.
- Tenders have now been received and the preferred contractor is due to start the repair of the Havelet Slipway during Quarter 3 of 2022.
- The options for the runway improvements and extension relating to the Alderney Airport Pavements Rehabilitation project have now been developed. Preparations are in place for bringing forward a proposal to consider the implications for a revised approach and change of scope. Communications on the options have included stakeholder workshops during February/March.
- A contractor commenced work in

February to reinstate Mont Crevelt Breakwater which is expected to be completed by December 2022. This will enable the continued fill of the remaining space for the inert waste disposal facility within the breakwater at Longue Hougue.

- The Inert Waste project is currently awaiting the potential for the strategic use of Les Vardes Quarry to be formalised. This includes an assessment as to whether it may be possible to accommodate dual use of the Quarry for water storage and inert waste management. Stockpiling of inert waste will be a short-term solution to managing inert waste when the existing facility at Longue Hougue reaches the end of its operational life.

	<p>Review operations of health benefit funding following transfer to the Committee for Health & Social Care</p>			<p>Design and implement a scheme for the Funding of Medical Treatment for Guernsey and Alderney Residents Travelling in the UK</p>

PRIORITY 3	
<p>ENABLE ACCESSIBLE AND AFFORDABLE 21ST CENTURY HEALTH AND CARE SERVICES (PART 2)</p>	<p>AREA OF FOCUS: COMMUNITY INVESTMENT</p>

PRIORITY 4 – RESHAPING GOVERNMENT

WORKSTREAM SUMMARY

PRIORITY ACTIONS		REMAINING TERM		NEXT TERM	PRIORITY 4	AREA OF FOCUS: NEW WAYS OF WORKING
2022	2023	2024	2025	2026		
	Implement 21 st Century front facing public services C				ENABLE THE TRANSFORMATION OF PUBLIC SERVICES TO MEET 21 ST CENTURY REQUIREMENTS	
	Implement 21 st Century strategic services for government C					
	Design and implement 21 st Century property and facilities management services across government C					
	Transform public service IT C					
	Deliver digital transformation of the Royal Court C					
	Carry out public service workforce planning					
	Prepare for, plan and deliver the further rationalisation of States property C					
	Prepare for, plan and deliver the rationalisation of the Home Affairs Estate C					
2022	2023	2024	2025	2026	ESTABLISH COMMISSIONING INFRASTRUCTURE	
	Develop and establish an approach to commissioning					
	Review commissioned services					
	Explore the options for a Nature Commission	→ <i>If agreed, implement Nature Commission</i>				

PRIORITY ACTIONS		REMAINING TERM		NEXT TERM	PRIORITY 4
2022	2023	2024	2025	2026	
Agree a sustainable taxation policy	→ <i>Implement the agreed taxation policy</i>				SUSTAIN GOVERNMENT FINANCES
Implement secondary pensions L					
Introduce the new governance model for Seized Asset Fund L					
Establish the Dormant Accounts Fund L					
Implement International Public Sector Accounting Standards					
Define the universal health offering					
Deliver the Revenue Service Target Operating Model & associated IT replacement L C					
	Provide for equity release mortgages in Guernsey L				
	Consider options for covering waste charge shortfall				

PRIORITY ACTIONS		REMAINING TERM		NEXT TERM	PRIORITY 4
2022	2023	2024	2025	2026	
Replace the bus fleet – complete phases 1 & 2 and commence phase 3 C					<p style="text-align: center;">MAINTAIN ESSENTIAL INFRASTRUCTURE AND SYSTEMS</p>
Replace the cremator C					
Replace the Electronic Patient Record System C					
Replace St Sampson's fire main pump C					
Replace Virtual Machine Environment (VME) C					
Provide Tetra PSN (public safety network) C					
Clinical and animal waste incinerator C					
Complete Alderney Airport pavement rehabilitation C					
Replace Guernsey Registry IT systems C					
Carry out necessary SAP system updates C					
Reinstate Mont Crevelt Breakwater C					

AREA OF FOCUS: LONG-TERM SUSTAINABILITY

PRIORITY ACTIONS		REMAINING TERM		NEXT TERM	PRIORITY 4
2022	2023	2024	2025	2026	
Implement an online passport system					<p style="text-align: center;">MAINTAIN ESSENTIAL INFRASTRUCTURE AND SYSTEMS</p>
Deliver the future inert waste facility					
Repair Havelet slipway					
Repair/replace Castle Emplacement Bridge					
Repair Fermain wall					
				Purchase & install additional MRI scanner	
				Refurbish Castle Cornet	
				Replace CCTV systems	
				Deliver further coastal flood defences	
				Deliver solution for Territorial Seas & Fisheries Enforcement	
				Plan & deliver the HSC Digital Roadmap	
				Deliver the future Guernsey Dairy	

AREA OF FOCUS: LONG-TERM SUSTAINABILITY

PRIORITY ACTIONS		REMAINING TERM		NEXT TERM	PRIORITY 4
2022	2023	2024	2025	2026	
Secure changes to Royal Sanction					<p style="text-align: center;">ENHANCE THE OPERATION OF GOVERNMENT</p>
Identify options to independently determine States Members and Non-States Members remuneration					
Review how government works to meet islanders' needs					
Automate the electoral roll					
Introduce simultaneous electronic voting in the assembly					
Review of Code of Conduct for States' Members					

AREA OF FOCUS: EFFECTIVE GOVERNMENT

GOVERNMENT WORK PLAN 2022 – ACTION CATEGORIES

All actions within Priority 3 (Delivering Recovery Actions) of the Government Work Plan framework, and particular priority actions in the other Priorities, are included in the tables below. Each table is a category of action and has been used to develop the proposed phasing in the GWP. Actions marked as ‘follow on action’ are dependent on the completion of the preceding action in order to commence.

CATEGORY	DESCRIPTION	RECOMMENDATIONS	
		SUGGESTED RESOURCING	SUGGESTED PHASING
Category 1 – Priority Actions	Actions which have been identified as priorities for the 2022-2023 period and which need to be delivered to meet major challenges or take-up time sensitive opportunities.	Resource as a priority.	Phase 1: Start/continue in the 2022-2023 period
Category 2 – Actions in train	Actions which have started and have funding allocated (although not necessarily human resource).	Resource as far as possible considering priority actions.	Phase 1: Start/continue in the 2022-2023 period
Category 3 – Action scoped but not yet started	Actions where the work required for delivery has been scoped but which have not yet started	Consider for resource prioritisation in the context of higher category actions.	Phase 2: Commence within this term if/when possible.
Category 4 – Actions not yet scoped	Actions which have been identified but the work involved is not yet known.	No resource at present – sponsoring Committee may scope action further and submit to 2023 GWP refresh for resource allocation.	Phase 3: Do not commence this term. Consider for next term.
Category 5 – actions no longer required in the GWP	Actions which have been completed or superseded or which are no longer required.	No resourcing required.	No work will be undertaken.

CATEGORY 1: PRIORITY ACTIONS – Committees’ priorities for States’ consideration

ACTION DESCRIPTION	ACTION BREAKDOWN	PHASING	YEAR ADDED TO THE GWP	Meet Housing Needs	Community Investment						
<p>Housing Evaluate and prioritise development of the more impactful policy interventions to the private housing market to increase its capacity and affordability; implement the General Housing Law with regards improving Housing Standards (considering any potential negative impact on private rental stock in terms of its priority over other policy development work and implementation dates); and progress proposals to the States by December 2022 on (1) housing need, and (2) management of States’ housing stock.</p>	Evaluate and prioritise development of the more impactful policy interventions to the private housing market to increase its capacity and affordability	2022-2023	2021			Meet Housing Needs	Community Investment				
	Evaluate and implement interventions to address key worker housing capacity and affordability	2022	2021					Meet Housing Needs	Community Investment		
	Progress proposals to the States on the States Strategic Housing Indicator	2022	2021							Meet Housing Needs	Community Investment
	FOLLOW ON ACTION: Respond to housing indicator requirements, specifically developments and funding to, in partnership with the GHA, to provide more affordable housing to meet requirements	2023 - 2026	2021								
	Progress proposals to the States on the potential transfer of the States’ social housing stock to the Guernsey Housing Association	2022	2021	Meet Housing Needs	Community Investment						
<p>Population Determine what the Island’s future population policy needs to deliver and set out a pathway to address the challenges that are being faced by the economy today; and resource actions for the remainder of this term as a critical enabler.</p>	Review population policy to determine what the Island’s future population policy needs to deliver and set out a pathway to address the challenges that are being faced by the economy today	2022	2021			Responsive Population Measures	Community Investment				
	FOLLOW ON ACTION: Deliver actions necessary to implement the review recommendations as agreed by the States	2023-2025	2021					Responsive Population Measures	Community Investment		

<p><u>Skills and human capital development</u> Agree a plan to enable a community skilled to meet its needs; and embed operationally to implement actions to the end of the political term; and plan for a continued delivery mechanism into the following political term.</p>	Develop an action plan to successfully grow knowledge and skills to meet community needs (including immediate action delivery where possible)	2022	2021	Promote Education, Skills and Learning
	FOLLOW ON ACTION: Continued delivery of human development capital plan actions	2022-2025	2021	
<p><u>Support the next generation</u> Resource work to conclude Children’s Law enabling Ordinances and their implementation; and invest in education delivery through the strategic and operational support to be delivered within schools and settings following Ofsted Inspection.</p>	Strategic and operational support to be delivered within schools and settings following Ofsted Inspection.	2022-2024	2021	
	Conclude Children’s Law policy and legislative development	2023	2021	
	FOLLOW ON ACTION: Implement agreed changes to the Children’s Law	2024	2021	
<p><u>Health Recovery</u> Agree proposals to provide targeted support based on affordability in respect of primary care appointments and access to aids and adaptations; and establish whether or not to explore the introduction of a compulsory insurance scheme for Primary Care.</p>	Develop future model for primary care and access to aids and adaptations and explore interest in a compulsory insurance scheme (including an update on the Bailiwick Social Prescribing Pilot)	2022	2021	Enable Accessible and Affordable 21 st Century health and Care Services
	FOLLOW ON ACTION: Follow on actions – implementation and ongoing review of the model	2023-2025	2021	
<p><u>Improve Living Standards</u> Conclude a review of minimum income standards with initial focus on income support and winter fuel allowance; and conclude proposals for the funding options for long-term care.</p>	Supported Living and Ageing Well Strategy (SLAWS): Review funding options for Long-term Care and develop proposals	2022-2023	2021	Support Healthy Living
	Conclude review of minimum income standards with initial focus on income support and winter fuel allowance	2023-2024	2022	
	FOLLOW ON ACTION: Implement the review recommendations as agreed by the States	2024-2025	2022	

<p>Energy Resilience – Electricity and Renewables Develop the electricity strategy for the Island; and resource priority action in year one of its implementation plan to improve the outlook for an increase in use of renewables.</p>	Develop the electricity strategy for the Island	2022	2021	Secure Future Energy Requirements	Connectivity and Infrastructure
	FOLLOW ON ACTION: Implement actions to improve the outlook for an increase in use of renewables.	2023-2024	2021		
<p>Enabling Climate Change Mitigation and Adaptation Respond to the agreement in principle to extend the Paris Agreement to the Island by establishing an expert panel to scope a proportionate and pragmatic pathway to net zero for funding consideration by the Assembly within the next 12 months.</p>	Establish climate change expert panel and scope a proportionate and pragmatic path to net zero	2022-2023	2022	Invest in Nature and the Natural Economy	Sustainable Economic Recovery
	FOLLOW ON ACTION: Implement agreed recommendations	2023-2026	2022		
<p>First Steps for the blue and green Economy Create plans, based on best available evidence, that maximise the sustainable social and economic use of our island and marine environment, including support for emerging economic opportunities (including international trade agreements), tourism, Green Finance and renewable energy.</p>	Blue Economy: Carry out sea-bed survey	2022-2023	2021	Invest in Nature and the Natural Economy	Sustainable Economic Recovery
	Green Economy: Carry out habitat mapping	2022-2023	2021		
<p>Future Harbour Requirements Agree the preferred direction for Guernsey's future harbour requirements to ensure that any regeneration of the seafront is within a clear strategic framework.</p>	Agree the preferred direction for Guernsey's future harbour requirements and seek States approval	2022	2021	Enable Opportunities for Regeneration	Sustainable Economic Recovery
	FOLLOW ON ACTION: Continue work towards the preferred direction for Guernsey's future harbour requirements	2023-2025	2021		
	Establish Development Agency and develop a strategic framework for States approval	2022	2021		

<p><u>Maintain compliance with international standards</u> Maintain compliance with international standards on financial crime and regulation and prepare for international evaluations.</p>	<p>Maintain compliance with international standards on financial crime and regulation and prepare for international evaluations including:</p> <ul style="list-style-type: none"> • Prepare for MONEYVAL 2024; Ongoing preparation for other periodic evaluations; Legislative changes & associated legal aspects of evaluations; Implement required Law Enforcement structure & upgrade systems 	<p>2022-2025</p>	<p>2021</p>	<p>Ensure compliance with agreed international agreements/standards</p>	<p>International agreements and conventions</p>
--	---	------------------	-------------	---	--

CATEGORY 2: ACTIONS IN TRAIN

All actions in category 2 were included in the 2021 Government Work Plan framework.

It is recommended that these actions continue to form part of the Government Work Plan and are provided with human resources as far as possible. This should help to ensure that the States gain the greatest benefit from resources which have already been committed.

ACTION	ANTICIPATED END-DATE	YEAR ADDED TO THE GWP	Invest in the Finance Sector	Sustainable Economic Recovery		
Continued investment in promoting Guernsey’s finance sector	2023	2021			Accelerate the Digital Economy	
Digital Framework action plans – invest in and develop the local digital economy	2025	2021				
Continued support for digital skills and pathways	2025	2021				
Promote and support innovation, transformation and entrepreneurial growth in the digital sector (scale-ups)	2025	2021				
Establish regulation and legislation to enable the digital sector	2023	2021				
Implement a universal fibre broadband network	2026	2021				
Establish a 5G licensing framework	2024	2021	Unlock Enterprise			
Scope requirements for an Enterprise Plan	2022	2021				
Consider the options for Guernsey enterprise zones	2023	2021				
FOLLOW ON ACTION: If agreed, implement enterprise zones	2024	2021				
Consider the options for Enterprise Investment Schemes	2023	2021				
FOLLOW ON ACTION: If agreed, Implement Enterprise Investment Schemes	2024	2021				
Introduce investor/entrepreneur visas	2024	2021				
Support emerging economic opportunities	2026	2021				
Explore opportunities for further development of the general and commercial aviation sectors	2023	2021				

Amend Guernsey's approach to Limited Partnerships and update the Law	2022	2021	Invest in the Visitor Economy
Finalise Tourism Product Development Plan;	2022	2021	
FOLLOW ON ACTION: Implement tourism Product Development Plan; prepare & invest in tourism product & accommodation including: <ul style="list-style-type: none"> • Events celebrating arts, culture, heritage & sports • Guernsey's unique heritage, • Guernsey's arts & culture, • Eco-tourism, and • Modernisation of the accommodation sector. 	2023 – 2026	2021	
Update the Environmental Pollution Law	2022	2021	Invest in Nature & the Natural Economy
FOLLOW ON ACTION: Implement the Environmental Pollution Water Ordinance	2023	2021	
Prepare and implement updated animal welfare legislation	2023	2021	
Amend legislation to support the regulation of the first sale and purchase of fish and shellfish	2022	2022	
Implement agreed aggregate supply solution	2025	2021	Enable Opportunities for Regeneration
Determine the future strategic use of Les Vardes	2023	2021	
FOLLOW ON ACTION: Purchase negotiation	2024	2021	
Conclude decision making on the future inert waste facility	2022	2021	
Develop and agree a Bridge Strategy (excluding St Sampson's Harbour)	2022	2021	
FOLLOW ON ACTION: Implement the Bridge Strategy	2025	2021	
Complete local planning briefs for the Harbour Action Areas	2024	2021	
Amend the Land Planning and Development Ordinances to provide for further planning permission exemptions	2023	2022	

Support air route connectivity	2025	2021	Secure Transport Connectivity & Infrastructure	Connectivity & Infrastructure
Create a proportionate licensing regime for Roll On/Roll Off ferry services	2022	2021		
Upgrade the airport baggage handling system – Stage 1	2022	2021		
Upgrade the airport baggage handling system – Stage 2	2025	2021		
Conclude Guernsey Airport runway extension decision	2022	2021		
FOLLOW ON ACTION: Respond to runway decision	2025	2021		
Update Investigation of Air Accidents & Incidents legislation	2022	2022		
Implement the reorganisation of secondary and post-16 education	2025	2021	Promote Education, Skills & Learning	Community Investment
Implement recommendations of the nasen Report on SEND provision	2025	2021		
Repeal and replace the Education Law – Projet & Policy Development (Ordinances and implementation in Category 3)	2023	2021		
Address the areas where COVID-19 has negatively affected learning and the school environment	2022-2024	2022		
Strategic investment in continuous education improvement	2026	2021		
Plan and deliver digital transformation for schools (including hardware and soft skills such as behaviour, culture etc.)	2024	2021		
Plan and deliver the Guernsey Institute	2025	2021		
Scope and deliver urgent measures to relieve pressures in current housing market	2022	2021	Meet Housing Needs	
Implement the General Housing Law – Phase 1 – Improving Housing Standards and Phase 2 – rent protection deposit scheme	2022-2024	2021		
Develop Justice Framework (building on the criminal justice strategy to respond to social justice needs)	2022	2021	Keep the Island Safe & Secure	
Update parole legislation	2024	2021		
FOLLOW ON ACTION: Implement legislation	2025	2021		
Update sexual offences legislation – secondary legislation	2023	2021		
FOLLOW ON ACTION: Implement legislation	2023	2021		

Enhance domestic abuse services in line with the updated domestic abuse, sexual abuse and violence strategy (including a Sexual Assault Referral Centre (SARC) three-year pilot)	2025	2021	
Rescope approach to vetting and barring scheme and revisit legislative requirements	2023	2021	
Explore options for alternative and non-punitive approaches to the possession and use of small quantities of illegal drugs	2022	2021	
FOLLOW ON ACTION: Implement agreed recommendations of the exploration into alternative & non-punitive approaches	2023	2021	
Reform the Adoption Law (primary legislation)	2022	2021	
FOLLOW ON ACTION: Develop secondary legislation and implement Adoption Law changes	2025	2021	
Conclude and implement Matrimonial Causes Law reforms incl. amendments to Domestic Proceedings Law	2023	2021	
Implement the Capacity Law	2023	2021	
Prepare a new Credit and Finance Law	2022	2021	
Develop policy & introduce Phase 1 of Discrimination Ordinance (incl. grounds of religious belief & sexual orientation)	2023	2021	
Conclude primary legislation for regulation of health & care	2023	2021	
Advance legislation re: requirement to pass theory test prior to driving on the road as a provisional licence holder	2023	2021	
FOLLOW ON ACTION: Implement legislation	2024	2021	
Evaluate, appraise learning from the Bailiwick's COVID response	2024	2022	
FOLLOW ON ACTION: Implement outcomes	2025	2022	
Review the grounds governing the Appeals Law	2022	2022	
FOLLOW ON ACTION: Develop, legislate, and implement Appeals Law	2025	2022	
Scope & deliver improvements to occupational health & wellbeing services post-COVID-19	2023	2021	Support Health Living
Implement a system to reduce backlogs and waiting times in health and care services	2025	2021	
Plan and agree the structure & location of a Community Hub	2023	2021	
FOLLOW ON ACTION: Design and delivery of the Community Hub	2025	2021	
Conclude Footes Lane refurbishment	2024	2021	
Scope tier 3 and 4 weight services	2022	2022	
FOLLOW ON ACTION: Introduce tier 3 and 4 weight services	2025	2022	

Develop and run an enhanced mental health service pilot	2022	2021	Enable Accessible & Affordable 21st Century Health & Care Services
Commence the Human Tissue & Transplantation Law	2022	2021	
FOLLOW ON ACTION: Implement the Human Tissue and Transplantation Law	2023	2021	
Implement NICE TA drugs Tranche 2 – ICER per QALY of up to £40k	2023	2021	
Enable indemnity insurance for health & care providers	2022	2021	
Our Hospital Modernisation – phase 1	2024	2021	
Our Hospital Modernisation – phase 2	2026	2021	

CATEGORY 3: ACTIONS SCOPED BUT NOT STARTED

Actions in this category have been scoped but have not yet been started, **It is recommended that the actions are progressed within this term.**

ACTION	PHASING	YEAR ADDED TO THE GWP		
Carry out Statutory Review of the Island Development Plan	2023 – 2025	2022	Invest in Nature & the Natural Economy	Sustainable Economic Recovery
Develop a Natural Capital Atlas for our marine and terrestrial environment	2023	2021		
Blue Economy: Conduct a marine biodiversity net gain pilot	2023	2021		
Blue Economy: Fully develop marine biodiversity net gain	2024	2021		
Blue Economy: Develop a blue economy supporting plan	2024	2021		
Blue Economy: Develop a marine biosecurity plan	2023	2021		
Green Economy: Carry out a biodiversity net gain feasibility study	2024	2021		
Green Economy: Develop and transition to biodiversity net gain	2025	2021		
Green Economy: Develop a green economy supporting plan	2025	2021	Secure Future Energy Requirements	Connectivity & Infrastructure
Develop a licensing framework to support on-Island renewable energy	2022 – 2023	2021		
FOLLOW ON ACTION: Replace the Education Law – Ordinances & implementation	2024 – 2025	2021	Promote Education, Skills & Learning	Community Investment
Frame and commission of legal aid in context of justice framework	2022 – 2023	2022	Keep the Island Safe & Secure	
Review Health & Safety legislation	2025	2022		
Develop policy & introduce Phase 2(A) of the Discrimination Ordinance: Age & Sex Grounds (Preparation for Phase 2 will need to commence ahead of the end of Phase 1)	2023 – 2024	2021		
FOLLOW ON ACTION: Develop policy & introduce Phase 2(B) of the Discrimination Ordinance: Equal Pay for Work of Equal Value	2026	2021		
Review of practical application of NICE TA changes and consider the next stages	2023	2021	Enable Accessible & Affordable 21st Century Health & Care Services	
Review operations of health benefit funding following transfer to the Committee <i>for</i> Health & Social Care	2023	2021		

CATEGORY 4: ACTIONS NOT SCOPED

Actions in this category have not yet been scoped by their sponsoring Committees, as such, these actions are not funded or resourced at this stage. **It is recommended that these actions are scheduled to commence next term, however Committees have the flexibility to scope the actions further and put them forward for prioritisation in the 2023 refresh.**

ACTION	PHASING	YEAR ADDED TO THE GWP		
Review licensing framework and regulation of utilities	2026	2021	Secure Future Energy Requirements	Connectivity & Infrastructure
Scope the repeal and replacement of island road traffic legislation to discharge elements of Integrated Transport Strategy	2026	2021	Secure Transport Connectivity & Infrastructure	
Review the delivery of primary education	2026	2021	Promote Education, Skills & Learning	Community Investment
Review availability, provision and funding of accommodation for elderly people	2024	2021	Meet Housing Needs	
FOLLOW ON ACTION: Implement decisions from the review of accommodation for elderly people	2025-2026	2021		
Review the provision of emergency accommodation in Guernsey	2024	2021		
FOLLOW ON ACTION: Implement emergency accommodation review decisions	2025-2026	2021	Keep the Island Safe & Secure	
Update RIPL (Regulation of Investigatory Powers) legislation	2026	2021		
Update PPACE (Police and Criminal Evidence) legislation	2026	2021		
Sentencing Review	2026	2021		
Repeal & replace Fire Law	2026	2022		
Regulation of health & care secondary legislation and implementation	2026	2021		
Consideration of further employment protection measures	2026	2022		
Review of the purpose and need for industrial medical benefit	2026	2022	Enable accessible and affordable 21st Century Health and Care services	
Improve access to personalised health and care information	2026	2021		
Review of the Medicines Law	2026	2022		
Review end-of-life care	2026	2021		
Design and implement a scheme for the Funding of Medical Treatment for Guernsey and Alderney Residents Travelling in the UK (likely to be superseded – see Appendix 1)	2026	2021		

FOLLOW ON ACTION: SLAWS: Develop and implement proposals to extend Long-term Care benefits to include care in people's own homes	2024	2021		
FOLLOW ON ACTION: SLAWS: Explore a higher rate of benefit for complex cases with exceptional needs in care homes	2024	2022		
FOLLOW ON ACTION: SLAWS: Develop a digital care needs assessment model to address increased demand and variety of benefit rates	2024	2022		

CATEGORY 5: ACTIONS NO LONGER REQUIRED IN THE FRAMEWORK

Actions in this category are no longer required in the Government Work Plan framework. Actions may have been completed or may have been superseded or deprioritised. **It is recommended that the Government Work Plan update seek to rescind relevant Resolutions where required to remove superseded actions.**

ACTION	FRAMEWORK STATUS		
Establish Future Telecoms Strategy	COMPLETED	Accelerate the Digital Economy	Sustainable Economic Recovery
Determine the future aggregate supply policy	COMPLETED	Enable Opportunities for Regeneration	
Conclude appraisal of government involvement in developing Leale's Yard	SUPERSEDED		
Agree cost reflective tariff for electricity	COMPLETED	Secure Future Energy Requirements	Connectivity & Infrastructure
Determine air and sea links policy	COMPLETED	Secure Transport Connectivity & Infrastructure	
Provide for parking permits for residential on-street parking	SUPERSEDED		
Conclude the policy decisions on the reorganisation of secondary and post-16 education	COMPLETED	Promote Education, Skills and Learning	Community Investment
Implement NICE TA drugs Tranche 1 – ICER per QALY of up to £30k	COMPLETED	Enable Accessible & Affordable 21st Century Health & Care Services	

SUMMARY OF KEY ACTIONS RAISED BY COMMITTEES**Committee *for* Education, Sport & Culture****Recovering from the pandemic**

- 1.1 While the continued efforts of staff, parents, and learners – coupled with the wider community adherence leading to relatively short lockdowns in the Bailiwick – has left the Bailiwick in a favourable position and has significantly mitigated the effects of the pandemic on children and young people, educational delivery has unavoidably been affected.
- 1.2 Through both periods of lockdown, and the subsequent resumption of services, the Committee *for* Education, Sport & Culture, supported by educational leaders, has sought to understand the pandemic's effects on progress and attainment as well as mental health and wellbeing across the workforce and student population. While many learners have been able to adjust successfully to the unprecedented circumstances, the Committee *for* Education, Sport & Culture has considered how to provide more focused support to those most affected.
- 1.3 The Committee has identified several areas where the available data indicates the need for specific action and has already started to address issues. While benefits are being seen, the Committee believes that further, targeted activity is necessary through one-off measures of £1.314m over 2022-2024.

Strategic investment in continuous education improvement

- 1.4 In addition to the direct effects of the pandemic detailed above, the longer-term development of continuous educational improvement has been affected indirectly by the pandemic with resources necessarily focusing on the immediate provision of services, leaving insufficient capacity to progress wider work. This has unavoidably led to several workstreams being affected including:
 - Building resilience in education delivery – The Committee *for* Education, Sport & Culture is seeking an ongoing funding requirement of £1.04million per annum from 2023 as an additional revenue spend for the 'Strategic investment in continuous education improvement' in the GWP to permanently increase the capacity and resilience in education services. The Committee advises this investment is necessary to bring about a more sustainable delivery model able to respond flexibly in the future, resilient to disruption, and ultimately to bring about improved outcomes.

- The implementation of the Guernsey and Alderney SEND Review by the National Association for Special Educational Needs. Completed in Spring 2021, this sets out a number of recommendations over the short and medium term including the staged elevation of the level of universal provision, updates to the SEN Code of Practice, and greater strategic and operational alignment between Education Services and Health and Social Care Services. The recommendations were approved in full by the Principal Committees involved and baseline funding for additional resources was agreed through the GWP last year. The work now requires the allocation of resources in the short term to lead and implement the work:- a one-year post to develop and establish implementation plans for a new SEND Code of Practice, and a two-year post to lead on the operational integration of relevant services across Education Services and Health and Social Care services.
- School inspections have resumed this academic year following extensive work with Ofsted to develop a new local inspection framework which acknowledges the unique education system, will allow schools to demonstrate the breadth of curriculum, and how they contribute towards learners' broader development. The framework provides opportunity for independent and impartial feedback to schools, supporting their continued improvement and the development of learners' skills and resilience, linking to the ongoing work in respect of skills and human capital development. A two-year post is needed to lead on the strategic and operational support, ensuring schools receive appropriate monitoring, support, and challenge while the new inspection framework embeds.
- The repeal and replacement of the outdated Education Law is an ongoing and necessary enabler for the 21st Century education system the Bailiwick deserves. The Committee recommends that the high-level policy development work which would underpin a new enabling law be brought forward to commence in 2023 to ensure it is concluded this political term, noting that subsequent secondary legislation will be needed but this work has not been scoped. This will be best accelerated by securing short-term additional support additional to the capacity within the Committee's Office.

Committee for Employment & Social Security

Long Term Care Insurance Scheme

- 1.5 Since the introduction of the Long-term Care Insurance Scheme in 2003 to assist eligible islanders with the cost of care in private nursing and residential homes, there has been an acknowledged challenge in balancing islanders' fair access to care and ensuring the long-term sustainability of funding.

- 1.6 In 2016, the States directed that the Policy & Resources Committee would be responsible for ensuring that the Supported Living and Ageing Well Strategy continues to be taken forward. In August 2020, the States considered a subsequent Policy Letter entitled 'The Supported Living and Ageing Well Strategy: Extending the Life of the Long-term Care Insurance Scheme'¹ which sought to stabilise the care market; encourage investment to meet growing demand; extend long-term-care benefits to incorporate care provided at home; and secure the long-term sustainability of the Scheme.
- 1.7 The Policy & Resources Committee, as part of the Review of Taxation and in consultation with the Committee *for* Employment & Social Security, was directed to identify a suitable source of funding to ensure the long-term stability of the Long-term Care Insurance Fund.
- 1.8 Short-term action has been taken to address the viability of the sector through increases to the weekly rates of long-term care benefits and the co-payment paid by individuals.
- 1.9 However, longer-term actions remain outstanding: the extension of funding to incorporate care at home (addressing the complexity of current arrangements and the resultant inequalities and inconsistencies); and the introduction of a higher rate of benefit payable for exceptional and complex cases. These need to be re-assessed.
- 1.10 Operational issues centre on the establishment of contractual arrangements with providers in order to provide certainty of income for the care home and certainty on the number of beds available at 'States rates'; and measures to ensure the financial sustainability of the Long-term Care Insurance Fund in the context of the changing demography also remain outstanding.
- 1.11 The strategic and operational importance of securing a sustainable future approach to long-term care, and the detrimental impact of current arrangements on islanders, providers, and the States of Guernsey, continues.
- 1.12 There is currently insufficient bed capacity within the care home sector to meet demand. This has consequentially placed increased pressure on Health and Social Care services, leading to islanders remaining in less appropriate care settings. This detrimentally affects the individual, their families, and the wider care system as the reduced patient-flow through the hospital contributes towards the regrettable, but necessary, postponement of other healthcare interventions. Managing the consequences, rather than addressing the root causes of the current challenges, risks a short term, reactionary approach and the Committee *for* Employment & Social Security has suggested a concerted effort by the States

¹ [Billet d'État XVI of 2020](#)

is required to assist the market and provide support to affected islanders in a sustainable manner.

- 1.13 The Committee *for* Health & Social Care has strong working relationships with the care home sector which have been developed further, and formalised, over the course of the pandemic. However, it is recognised that the success of these operational relationships is ultimately reliant on the appropriate legislative and financial framework. In addition to giving effect to the strategic direction set through the Supported Living and Ageing Well Strategy, there are outstanding commitments to enhance the governance arrangements that exist at an operational level to ensure, and demonstrate, safety. It has been recognised since 2007² that there is opportunity to strengthen the existing regulation in the care sector and the planned, incremental introduction of regulation across the health and care system can help support this and be prioritised accordingly by the Committee *for* Health & Social Care once the Regulation Projet de Loi has been finalised. The need for appropriate adult safeguarding arrangements is well recognised and will become increasingly important as care models diversify to allow care at home, linking to the vetting and barring legislative work. Both these actions remain in the GWP and are phased to align with the developing funding model for long term care.
- 1.14 The population is ageing and the coordination of services, relationships with providers and clarity of services on offer is of increasing importance. It is a complex area and will draw heavily on both clinical subject matter experts and the States' policy team. It cannot currently be resourced by either Committee.

Minimum income standards

- 1.15 The increasing cost of living, and the associated effects of social conditions and inequalities in health and wellbeing, is acknowledged internationally and brings into increasing focus the efficacy of state support. There are a number of extant States' Resolutions which collectively have identified the need to ensure that local benefit rates are set at the right level, enabling islanders to participate in society, contribute to the economy, and achieve positive health and social outcomes for themselves and their families.
- 1.16 It is widely recognised that there is a strong correlation between low incomes and poor social outcomes in terms of health and education on an inter-generational basis. Income levels contribute towards an unequal ability for individuals to engage in meaningful work, secure housing, develop self-esteem, and maintain health behaviours. Recognising the longer-term benefits for individuals, the community and the economy, the States have previously made a number of commitments, including:

² [Billet d'État XX of 2007](#)

- To make use of any opportunities to improve health or reduce health inequalities, across all government policies³;
- To commission an independent analysis in order to update the minimum income standard for Guernsey.⁴ This was undertaken last year and even when adjusted by the Committee *for* Employment & Social Security to remove items deemed to be non-essential for benefit purposes, has illustrated, in some cases, significant misalignment with the current Income Support requirement rates;
- To co-ordinate an investigation of the most effective means of addressing energy poverty;⁵
- To address the future of the benefit limitation, earnings disregard and personal allowances⁶ to provide a greater incentive to work and thus support the work to invest in the Island's human capital.

1.17 The Committee *for* Employment & Social Security recommends that these workstreams are consolidated and accelerated through a prioritised focus on Income Support through 2022 and 2023. The Committee *for* Employment & Social Security places such importance on this work – given that those on low incomes are most likely to be affected by sudden or unforeseen economic changes – that it considers it necessary to deprioritise other workstreams, such as SLAWS, in order to reallocate its resources.

Committee *for the* Environment & Infrastructure

Maximise the sustainable social and economic use of our island and marine environment

1.18 The Committee *for the* Environment & Infrastructure is leading on the policy areas seeking to mitigate the impacts of climate change that are critical to our sustainability and resilience. If we use Guernsey's natural assets unsustainably, without some investment now, we will either irrevocably damage those assets or we will need to spend more to repair and sustain them in the future.

³ [Billet d'État XXIV of 2017](#)

⁴ [Billet d'État XXI of 2019](#)

⁵ [Billet d'État XI of 2020](#)

⁶ [Billet d'État XXIII of 2018](#)

- 1.19 The Committee is working to reduce dependence on hydrocarbons for fuel; to extend the Paris Agreement to the Island; and to create plans that maximise the sustainable social and economic use of our island and marine environment. The latter will include working with the Committee *for* Economic Development on exploring areas such as renewable energy.
- 1.20 The Committee has sought support in restructuring funding and allocation of additional resource to accelerate the three interdependent areas of policy – electricity and renewables; enabling climate change mitigation and adaptation; and the first steps for the blue and green economy.
- 1.21 The Committee has also worked with the Guernsey Community Foundation and other partners to establish a Nature Commission, which will support a community partnership approach to the Strategy for Nature. The benefits are many fold for both islanders’ wellbeing and our competitiveness in a number of economic sectors important to the Bailiwick where demonstratable commitment to our natural environment is important.

Committee *for* Health & Social Care

Review of the legal status of cannabis

- 1.22 Through the GWP, the Assembly agreed that work to *‘Explore options for alternative and non-punitive approaches to the possession and use of small quantities of illegal drugs’* should progress as resource became available.
- 1.23 The Non-punitive Approaches (NPA) Project Board was established with Members from both the Committee *for* Home Affairs and the Committee *for* Health & Social Care. At the start of its work, the NPA Project Board considered the relevant Resolution alongside the NPA timeline and the overall Bailiwick context. In considering the section 3(iii) *‘the potential for moving from a regime governed by the criminal law towards a partly or wholly regulatory approach to all aspects of personal drug use’*, the NPA Project Board used the following definitions:
- Decriminalisation – ceasing to treat something as illegal or as a criminal offence.
 - Legalisation – a regime in which a drug or drugs is/are decriminalised and aspects that may include production, distribution and taxation are controlled by government.

- 1.24 It was agreed that exploration of decriminalisation or legalisation would not be included as part of the NPA work, preferring a phased approach in order to make progress. In reaching this decision the NPA Project Board considered the wider Bailiwick context including the developing Justice Framework, and the cannabis industry and its Memorandum of Understanding (MOU) with the UK Government which makes any review of the legal status of illegal drugs, and cannabis in particular, a complex area of policy.
- 1.25 The review of the legal status of cannabis in this political term remains an objective of the Committee *for* Health & Social Care, notwithstanding it recognises that this would require detailed consideration of various political, reputational, and commercial aspects and comprehensive engagement with the community.
- 1.26 The work to consider a regulatory framework would likely require the additional involvement of the Committee *for* Home Affairs in relation to the Justice Framework; the Policy & Resources Committee will be engaged through its external relations mandate; and the Committee *for* Economic Development in relation to the cannabis industry. Indeed, views would likely also be sought from the Committee *for* Education, Sport & Culture, the third sector, clinical professionals, and the community, to inform any recommendations.
- 1.27 Subject to other demands associated with any potential future waves of COVID-19, the Committee *for* Health & Social Care has indicated, by a majority, that it would utilise its limited capacity within Public Health Services to scope the project in quarter 1 of 2023. The Committee would then bring forward through the 2023 GWP refresh its recommendation on whether to proceed, or not, together with the terms of reference and timeframe for the review, outlining its objectives and benefits, and its resourcing requirements, for consideration against competing areas of policy by the States.

Public Health Law review

- 1.28 In January 2022, the States considered a Policy Letter entitled ‘Living Responsibly with COVID-19’⁷. By Resolution, the GWP must consider the discharge of extant Resolutions to draft a new Public Health (Enabling Provisions) Law, disband the roles of Medical Officer of Health and Chief Medical Officer, and transfer functions. This needs to include impact of any prioritisation of this work during this term of government on the phasing and achievability of other actions in the GWP, having consulted with the Committee *for* Health & Social Care which was also directed to bring proposals as soon as is practicable to amend the Public Health Ordinance, 1936.

⁷ [Billet d’État II of 2022](#)

- 1.29 The Committee *for* Health & Social Care advises it has limited capacity to conclude current actions and is cautious to not over commit with new activity until they are completed. It would prefer to direct Public Health Services to complete a number of actions during 2022 that were paused due to the need to respond to the pandemic. This will preclude any swift activity to develop proposals to amend the Ordinances. Equally it wishes to conclude work on key secondary legislation and its implementation as set out in the GWP and not dilute the efforts of its small policy development team or Public Health Services.
- 1.30 Public Health Law is a complex area and will draw heavily on both professional and legal subject matter experts, and the policy team. Rather than approaching this legislative review in a piecemeal way, the Committee *for* Health & Social Care intends to scope the work associated with all extant States' Resolutions relating specifically to Public Health legislation to ensure an efficient and effective approach to this new area of work. Notwithstanding that the first Resolution dates from 2014, the Committee *for* Health & Social Care has on balance decided that this is not a priority and by a majority is not scheduling this work at this time. This view will be revisited annually as part of its contribution to the GWP refresh process.

Review of primary care

- 1.31 In 2021, through resourcing as work of strategic importance to the GWP, the Committee *for* Health & Social Care and the Committee *for* Employment & Social Security established a joint Working Group to consider the accessibility and affordability of primary care, its interrelationship with the wider health and care system and the effect of the current arrangements on health outcomes. This work seeks to understand and address current barriers to care, while safeguarding the current strengths of the system – high quality care, minimal waiting times, and strong continuity of care – with the aim of supporting islanders to access the care they need, when they need it, at rates they can afford. This is one aspect of a programme of work to reduce the rate over time at which health and care costs are rising, and improve islanders' experiences of healthcare through increased integration.
- 1.32 Proposals are due to be presented to the States later this year, seeking to address the most immediate political concern, affordability, while laying the groundwork for wider change in the future.
- 1.33 The proposals will consider the reallocation of existing States' expenditure to achieve better value through targeting funds more effectively. It is envisaged that any changes, if approved, could be phased for introduction over the rest of this political term.

- 1.34 The GWP identified last year the need to review the current Bailiwick Social Prescribing pilot so a decision can be made regarding the longer-term approach and associated funding and it is understood that this may also be accelerated through the review of primary care.
- 1.35 Opportunity will be taken through the policy letter to introduce potential insurance-based solutions, with the view that, if so directed by the States, more detailed modelling and costings would be developed as follow-on action established in the GWP for the Committee to resource and requiring some funding for engaging external insurance expertise. This will provide important information for a longer-term fundamental review of the way primary care is funded should that be needed.
- 1.36 In addition, to support user-centred care the review will discharge the extant States' Resolutions from June 2019 by considering the funding of disability-related equipment, aids, and adaptations. This will seek to address the acknowledged weaknesses of the current system while considering how the appropriate provision of aids and adaptations can help address wider system challenges. The cost implications and funding options are maturing.

Healthy Weight

- 1.37 The Committee *for* Health & Social Care is mindful that it will be considering proposals to introduce Tier 3 and 4 weight services under the 2016 Healthy Weight Strategy within the coming 12-month period, in collaboration with the Health Improvement Commission. Through the GWP, with its focus on achieving potential and addressing inequalities (obesity is disproportionately a disease of the poorer), the States need to acknowledge that failure to address these specific issues with intensive medical-based interventions will continue to cost the health service significant sums of money.
- 1.38 The interventions are proven to work. They are supported by the highest level of evidence and without a Tier 3 service the approved NICE drugs cannot be introduced.
- 1.39 The Committee, working with the Health Improvement Commission, hopes to attract additional funding for this important initiative alongside States funding of up to £150k per annum.

Committee *for* Home Affairs

Review laws governing grounds of appeal

- 1.40 The Committee *for* Home Affairs is working with the Guernsey Bar on the review of law governing appeals which is due to report by the end of 2022. Taking this

work forward will require policy development and legislative drafting support in 2023 depending on the findings and which the Committee is keen in principle to progress. It may be that not overly complex amendments are required to address issues, but more than one law is involved. Phased over 2022 to 2025, the Committee believes it can conclude this long overdue work within its own staffing, notwithstanding that it was not previously established in the GWP.

Domestic Abuse Strategy – including sexual abuse and violence

- 1.41 The Committee *for* Home Affairs is proposing that the Domestic Abuse Strategy be extended to cover sexual abuse and violence and consulted with Principal Committees in April 2022. This is in response to the 2015 Resolution ‘to investigate the merits of establishing a Violence Against Women and Girls (VWAG) Strategy’ which resulted from Amendment to the 2016-2020 Strategy⁸. Tackling domestic and sexual abuse is, and will continue to be, a key priority for the Committee during this political term.
- 1.42 It recognises the importance of cross-committee engagement and working collaboratively with the private and third sectors, to challenge and address the societal attitudes and behaviours that contribute towards domestic and sexual abuse. It has identified establishing a Sexual Assault Referral Centre (SARC) pilot as one of its priorities. Work to progress this key service has commenced with the Committee supporting the establishment of a multi-agency Steering Group to oversee the project. The objective is to develop a pilot SARC which will be evaluated after three years.
- 1.43 Initial costing for a SARC was prepared on the assumption that existing [police] premises would be used, however, after further assessment of what a SARC will provide it is not considered suitable to support the delivery of the full range of services. Scoping work has commenced and the current pressure on existing therapeutic services is acknowledged by the Committee which will likely result in additional investment in this area being part of the solution which is currently unfunded.

Vetting and barring legislation

- 1.44 It has become clear that the policy decisions made by the States in 2009 cannot be brought to conclusion as envisaged with regards to the Vetting and Barring Scheme.
- 1.45 The Committee *for* Home Affairs is concerned that this long-standing area of risk must be addressed and given the thwarted attempts to conclude the path originally established, it now intends to bring a further policy letter to inform the

⁸ Billet XXIII 2015

States of the changes made to the UK system in the intervening period and consider updates to Bailiwick legislation including the introduction of relevant offences equivalent to the UK Safeguarding Vulnerable Groups legislation. Local rehabilitation of offenders legislation will also be reviewed against the UK legislation as part of this work stream.

- 1.46 On this basis the Resolution remains valid, however the approach to discharge it will change. The Committee *for* Home Affairs advises that the GWP Framework should be amended to reflect a considerably longer timeframe for conclusion to implementation of this work which it is intending to resource internally.

Review of legal aid provision

- 1.47 The Committee *for* Home Affairs has acknowledged the benefits to a number of current GWP actions of undertaking a review of legal aid provision, as particularly identified through its political consultation on the Justice Framework by the Committee *for* Employment & Social Security which is mandated for the provision of the service.

- 1.48 Whilst important, it cannot be funded or resourced as a priority by the Committee *for* Employment & Social Security which itself is seeking to lead on other matters in the coming 12-24 months while still progressing the Discrimination Ordinance through to implementation. Given the wide-ranging touch points engaging a number of Committees' mandates, the Committee *for* Home Affairs has recommended that this new action is considered for resourcing by the Justice Review funding within the GWP. It would work with the Committee *for* Employment & Social Security and the Legal Aid Administrator to develop a terms of reference, on which it would consult other Principal Committees and the Policy & Resources Committee, but would require resource to manage both this preparatory work and the tender process, and to develop the cross-Committee proposals for the States' response to the findings.

Sentencing review

- 1.49 The high-level scoping with respect to objectives, benefits and risks has been completed with the Committee *for* Home Affairs expressing strong interest to accelerate this work by accessing the Justice Review funding. There are several approaches that need to be evaluated before the funding and resource requirement can be confirmed.

- 1.50 The Committee *for* Home Affairs will require resource from the very start of this work, to develop a terms of reference, to manage the tender process and develop any cross-Committee proposals for the States' response to the findings.

Cyber-security developments

- 7.43 In order to continue to meet international standards, and in collaboration with our partners in the UK and the other Crown Dependencies, Guernsey will need to further enhance its cyber-security actively in two critical areas. The first is to update online security legislation and scoping of that work is beginning. The extent of the work that follows will be dependent on the response, though if it is limited to enacting equivalent communications offences from the UK Online Safety Bill into domestic legislation this should not be onerous, though it will require policy and legislative resource. The second relates to ensuring equivalence in a number of areas to the UK Telecoms Security Bill. This work is also being scoped and will also require policy and legislative resource. These are essential actions which support the cyber focus in the priority 2 workstreams.

Development & Planning Authority

Review of the Island Development Plan

- 1.51 There is a statutory requirement for the Authority 'from time to time' to consider whether any alterations to the Development Plan (currently the Island Development Plan - IDP) are necessary and, if they are, to then amend the Plan. The Land Planning and Development (Plans) Ordinance, 2007, clarifies that the Plan has a life of ten years which would take the current IDP to November 2026. There is also a provision within the Ordinance for the States to extend the Plan by Resolution in which case it shall have effect until the date specified in that Resolution, but this does not override the requirement in the Ordinance to review a Development Plan at least every ten years.
- 1.52 Having considered the potential options concerning review of the IDP, the Authority favours a proportionate and responsive approach, focusing on a targeted consideration of policies which have been identified through monitoring, or are required to meet new strategy direction or priorities.
- 1.53 The Authority advises that the review and updating of spatial policies are of the utmost importance to ensure that the land use planning process continues to be an enabler and is not an impediment to the achievement of government objectives and priorities. The Authority would wish this review process to be completed within the current political term, if practicable, to include, if required, the States adding new policies into the Plan. The IDP review process would ideally commence in Q1 of 2023 with the intent of completion before the General Election in 2025.
- 1.54 Even a pragmatic and targeted IDP review process will require additional resource and funding, albeit the focus on those limited number of policies identified as needing review will enable a more cost-effective allocation of resources.

States' Assembly & Constitution Committee

Next General Election

- 1.55 The GWP envisaged that this term would see the delivery of a number of specific improvements to government processes and systems which will complement any wider reform, including changes to Royal Assent processes, the automation of the electoral roll and the introduction of simultaneous electronic voting in debates.
- 1.56 The States have agreed the implementation of electronic voting in debates, steered through by the States' Assembly & Constitution Committee. Its interest now is in the work of the Committee *for* Home Affairs which has to create a new electoral roll for the General Election every four years. Both the Committee *for* Home Affairs (the sponsoring Committee) and the States' Assembly & Constitution Committee support the progression of the extant Resolution to automate the electoral roll.
- 1.57 Since 2013, the intention of the States have been for Phase Two of the Rolling Electronic Census project led by the Policy & Resources Committee to provide for the automated generation of a list of persons eligible to vote, which could be used in the automation of the electoral roll. This has been completed and scoping is underway for the next phase led by the Committee *for* Home Affairs which will require both IT development and legislative changes.

States' Trading Supervisory Board

New dairy

- 1.58 The States determined their portfolio investment intentions for this term as part of their considerations of the GWP in July 2021 in order to finalise their funding and investment requirements in the F&IP. The requirement for a replacement dairy was identified as a pipeline project to be considered for funding in the next political term.
- 1.59 The strategic case for the Island to maintain a dairy operation has been reaffirmed by the Committee *for the* Environment & Infrastructure which considered "the appropriateness and relevance of the policy approach and the feasibility of other potential delivery models for a single dairy. The assessment did not consider the costs to the States of building and operating a new dairy, or the site selection process and any costs associated with it".

- 1.60 The States' Trading Supervisory Board has advised that the current dairy is no longer fit-for-purpose; that the level of ongoing maintenance represents a significant risk to the ongoing operation of the dairy; and that the cost of maintenance is likely to be up to £8.7 million over four years.
- 1.61 The Policy & Resources Committee is of the view that it is important that the financial and policy matters are now considered together and so the Committee is working with the States' Trading Supervisory Board to review the detailed breakdown of the costs of the project and the forecast cost of maintenance for the next four years.

OBSERVATIONS OF POLICY & RESOURCES COMMITTEE

- 1.1 The Policy & Resources Committee has carefully considered all the matters raised in today's context and in light of the strategic aims for this term:
- secure the Bailiwick's resilience;
 - maximise the community's collective potential; and
 - ensure we are competitive as an economy.

Committee *for* Economic Development

- 1.2 The Committee *for* Economic Development has played a key role in delivering four of the 2021 top ten recovery actions which were identified in the GWP in 2021 as being key to delivering a sustainable economic recovery: Digital, Skills, Finance and Tourism, and Transport.
- 1.3 During 2021 the Committee worked closely with the Policy & Resources Committee to establish a universal broadband fibre network by 2026 which was a top ten action because it will significantly enhance the digital connectivity for both Bailiwick businesses and residents which is a key economic enabler.
- 1.4 In support of this investment the Digital Framework has been published and a series of Action Plans will now be developed which focus on enabling infrastructure, developing skills and pathways, and innovation, transformation, and entrepreneurial growth.
- 1.5 The Committee is working jointly with the Committee *for* Education, Sport & Culture on a Human Capital Development Plan to enhance the knowledge and skills of Bailiwick residents which will be considered by the States this year and continues to be a prioritised action.
- 1.6 The Committee has increased Government's support for the finance industry by increasing the States of Guernsey's investment in Guernsey Finance to £2.5 million per annum from 2022 to 2024. The Committee is working jointly with the Policy & Resources Committee to bring proposals for new Lending, Credit and Finance Legislation during Q2 2022 alongside other work on the Island's legislative structure to support development of the industry. It is also keen to promote and enhance the tourism and hospitality sector and will bring a policy letter on the Tourism Product Development Plan during 2022.

- 1.7 The Committee is under a States' Resolution to bring a business case to the States that will examine the costs and benefits of extending the runway at Guernsey Airport to at least 1,700m, and having accelerated work on transport policy as a top ten action in 2021, it continues to invest energy in the Island's connectivity and transport, currently through developing the licensing regime for roll on/ roll off ferries.
- 1.8 Considerable resource is dedicated to workstreams within GWP Priority 2 - Managing the effects of Brexit - by working closely with industry and focusing on trade agreements to ensure that the Bailiwick remains a highly competitive and attractive jurisdiction.
- 1.9 The Committee has also actively invested in the work to promote responsive population measures which is coming to the States in Q2 2022. Housing remains a critical issue for the economy which the Committee feels is a key economic enabler and needs to be addressed as a matter of priority.
- 1.10 It now acknowledges a shift to focus on other enablers will support broadening the economy through renewable energy and green and blue economy supporting plans.

Committee for Education, Sport & Culture

- 1.11 The Policy & Resources Committee acknowledges the importance of the work proposed by the Committee for Education, Sport & Culture in improving educational outcomes, noting the longer-term impact on health outcomes, economic prosperity and potential resultant pressure on public services.
- 1.12 The use of available data to identify a targeted programme of work to support those most affected by the pandemic in those settings where the need is greatest is welcomed, as it should ensure a proportionate and focused programme of investment. The Committee for Education, Sport & Culture has redistributed funds to start the work which has already provided some investment in primary education and supporting services.
- 1.13 Looking across the four nations of the UK, current plans for education catch-up spending show that spending per pupil is due to be £400 in Wales, £310 in England, and about £230 in Scotland and Northern Ireland. However, plans for England currently extend through to 2022-23 and beyond, whilst they only apply for 2021-22 in Wales, Scotland and Northern Ireland. It seems highly likely that these plans will be extended once the devolved administrations learn the implications of England's spending plans for the 2022-23 grants they will receive.

In comparison, education catch-up plans for the Netherlands (£2,100 per pupil) and US (£1,800 per pupil) are far larger and more ambitious¹.

- 1.14 Based on 5000 learners, this request for Bailiwick students represents an injection of £262 per pupil over two years. The States will be aware that one-off investments in other services immediately impacted by the pandemic were agreed last year through the GWP, such as the surgical catch-up programme. The Committee *for* Education, Sport & Culture made it clear at that time that it was premature to submit funding requests through the F&IP as it continued to make internal adjustments and until that process concluded with the actions fully scoped, it would not estimate its requirements. Given the established impact on the education and wellbeing of the Bailiwick's children, and the dependence of the future prosperity in the hands of future generations, this targeted one-off investment over three years to accelerate their educational recovery is supported by the Policy & Resources Committee.
- 1.15 However, the Policy & Resources Committee is concerned that the long-term programme to build resilience and flexibility that requires 35 new posts – which is dependent on recruitment in a difficult market compounded by the well-established housing difficulties and cost of living pressures – may prove challenging to resource in this ambitious timeframe. This may result in a need to prioritise within the programme the operational developments which address the most immediate, and challenging, concerns.
- 1.16 The Committee *for* Education, Sport & Culture has confirmed that it is unable to resource this sustained programme within its existing budget given the work already undertaken to redistribute its resources to areas of greatest need. Therefore, an uplift in baseline costs should be considered as a permanent increase in operating cost.
- 1.17 The impact of the pandemic on the ability to progress wider workstreams illustrates the challenges of adequately resourcing the strategic projects to secure the benefits for the community; a number of short-term roles have been identified to recover the lost time on this work.
- 1.18 The Policy & Resources Committee supports the use of short-term roles for targeted acceleration of deliverables, over the use of external consultants or longer employment contracts, where there is a capacity shortfall and pressing urgency and where the impact of not doing so exacerbates the problems and impacts government services in the longer term. There are, however, potential recruitment and retention difficulties associated with short-term contracts.

¹ [Comparing education catch-up spending within and outside the UK - Education Policy Institute \(epi.org.uk\)](https://www.epi.org.uk)

- 1.19 The work proposed by the Committee *for* Education, Sport & Culture understandably at this time focuses on the educational aspects of its mandate, however it is important to note that resources were agreed last year to invest for a three-year period in the delivery of Active 8: A Plan for Sport and to establish the Language Commission.
- 1.20 In response to the work led by the Committee *for* Economic Development to develop a Tourism Product Development Plan, the Committee *for* Education, Sport & Culture may in 2023 need to consider the role of arts and culture, its strategic direction with regards to heritage management, and the reprioritisation of the current funding.

Committee *for* Employment & Social Security

- 1.21 The Policy & Resources Committee acknowledges that the work proposed by the Committee *for* Employment & Social Security directly links to maximising the community's collective potential and addressing the barriers which some islanders face. Both the ageing demographic and future pressures on household finances are likely to result in increased demands on public services over the coming years and the Policy & Resources Committee considers the focussed attention in these areas to be prudent.
- 1.22 The Committee *for* Health & Social Care is already affected by the challenging operating circumstances in the care sector, compounded by the continued effects of the pandemic. Until it is possible to maximise hospital resources through a reduction in delayed discharges, efforts to address health backlogs will be curtailed. The Policy & Resources Committee recognises the complexity of addressing this challenge, and the need to prioritise tactical policy development which addresses the most immediate, and challenging, operational concerns.
- 1.23 Similarly, the Policy & Resources Committee is mindful that given the increasing cost pressures on individual households, it is opportune to undertake a proportionate and pragmatic appraisal of today's situation in order to expedite any amendments to policy.
- 1.24 The work proposed by the Committee *for* Employment & Social Security may have potentially significant financial implications; needs to be considered in the context of the ongoing tax review to ensure long term sustainability; and is a considerable portfolio of policy work which will be challenging to resource. They are important areas of policy in terms of the community's resilience and ensuring equity for islanders and the Policy & Resource Committee agrees these need to be addressed this political term.

- 1.25 Having considered the advice of the Committee and the local context affecting islanders, and in its capacity to co-ordinate the work of the States, the Policy & Resources Committee has listed the theme ‘improve living standards’ as a priority set of actions for the States to consider. While resourcing is challenging, it will do all it can to ensure the best available knowledge and skills within the States expedite the work in both areas of policy. The first actions are to appraise income supports levels and review funding options for long-term care.

Committee for the Environment & Infrastructure

- 1.26 The Policy & Resources Committee recognises these three interdependent areas of policy – electricity and renewables; enabling climate change mitigation and adaptation; and the first steps for the blue and green economy – where, left unmanaged and without interventions, would expose the Island to higher costs and decreasing competitiveness, weakening its resilience.
- 1.27 In determining their Climate Change Policy and Action Plan in 2020, the States directed the Committee *for the Environment & Infrastructure* to investigate the necessary steps to establish an independent advisory body to provide advice to government and others on climate change matters, and to report back to the States by the end of 2021. The Committee was also directed to bring a policy letter to the States before the end of 2021, which set out proposals to adapt the Island to the effects of climate change.
- 1.28 This was not included in the recovery actions last year but is a follow-on action from the work seeking extension of the Paris Agreement that was given priority by the States as an action under P2 – Brexit and International Standards. The sponsoring Committee is keen to progress. However, it is a new Committee and mindful that as a small jurisdiction some solutions adopted elsewhere will be incompatible, the approach directed by Resolution is being adapted. The Committee *for the Environment & Infrastructure* will appoint an expert panel of appropriately skilled people tasked to develop pragmatic, proportionate and affordable climate change mitigation and adaptation proposals drawing on the wealth of data and activity in reference jurisdictions, with a focus on the areas that Guernsey can deliver more effectively and have the most impact. It intends to report ahead of the GWP refresh in 2023.
- 1.29 This is important to islanders and the economy alike, given an increasing focus on Environmental, Social and Governance (ESG) delivery and reporting. The States must address emerging risks and opportunities for the Bailiwick as a jurisdiction, namely international obligations, geo-political events, and climate change. With an eye on the long-term strategic needs of the Island, the Policy & Resources Committee is facilitating the States’ consideration of assigning recognition to these issues and the priority resourcing afforded priority actions.

- 1.30 Supporting plans that maximise the sustainable social and economic use of the Island's natural assets will ensure Guernsey can continue to promote itself as a leader in Green Finance; improve its energy resilience; and mitigate wider risks to our health and wellbeing. On this basis, and with the strategic aim of the GWP to ensure a competitive economy, the Policy & Resources Committee is again facilitating the States' consideration of assigning recognition to these issues established by their Strategy for nature approved in 2020, and thereby the resourcing afforded a priority recovery action.

Committee *for* Health & Social Care

- 1.31 There is considerable work to conclude in the GWP that engages the Committee *for* Health & Social Care's mandate including the delivery phase of the review of primary care to be resourced by the Committee further to the prioritised GWP resourcing for 2022 that the States will consider that would ensure the Committee can bring proposals to the States this year. There is also the continued GWP investment in the amendments to the primary Children Law to be considered, which has phase 2 work on secondary legislation which will also require resourcing by the Committee upon the conclusion of the first stage of work.
- 1.32 Its policy agenda has other important legislation yet to be fully implemented, as set out in the GWP Framework, notwithstanding there may be a planned pause with secondary legislation pursuant to the introduction of health and care regulation. There are also delays in hospital services to address, in part through policy approaches to long term care funding and service provision to release capacity in the hospital.
- 1.33 It also has to undertake reviews of NICE drugs and TAs, and Bailiwick Social Prescribing in the coming 12 months.
- 1.34 Operationally the Committee *for* Health & Social Care is overseeing very significant investment projects and managing challenging service delivery while embedding COVID-19 protocols into routine business.
- 1.35 It has raised two other policy matters in its consideration of prioritisation; both would progress work to discharge extant Resolutions. The first seeks to scope the work required to review the legal status of cannabis which has been held in abeyance by the project board discharging the extant Resolution to explore non-punitive approaches to small quantities of illegal drugs; the second, to scope the work required to progress with a new Public Health Law.

- 1.36 The Committee *for* Health & Social Care has identified capacity in quarter 1 of 2023 to scope the next priority health policy action that the States require addressed. It has recommended, by a majority, the preparation for a review of the legal status of cannabis take precedent.
- 1.37 By way of background, in July 2021 the States of Guernsey signed a Memorandum of Understanding (MoU) with the UK Home Office in order to strengthen and develop the nascent cannabis cultivation and processing sector in Guernsey. In response to this, the domestic licensing regime has been strengthened through the establishment of the Bailiwick of Guernsey Cannabis Agency, bringing together the different licensing and regulatory authorities.
- 1.38 The agreement of the MoU was complex and is based in part on the fact that Guernsey has a consistent and clear position on wider cannabis-related matters. It is essential that as the MoU is implemented, any change in policy with regard to the legal status of cannabis should consider the impact on the relationship with the UK Home Office and the licensing regime that is being put in place which is based on close consultation with the UK on the same matter. Any recommendations in relation to a shifting position in this respect could impact the developing industry and any associated agreements or negotiations.
- 1.39 The Policy & Resources Committee has, as a consequence of this becoming public knowledge, received strong and unanimous representation against listing this work in the GWP from the Committee *for* Home Affairs on the basis that in recommending the work in the GWP it risks absorbing limited resources on a very complex area of policy.
- 1.40 The States of Guernsey will be stretched to support this additional area of cross-Committee policy development given the other actions set out in the GWP, especially with respect to managing Brexit and meeting international obligations. Additionally, it has not been identified as a current and pressing matter by any other Committee that would be significantly involved. Furthermore, there are concerns that legalisation will require a regulatory function that will need to be established through legislation, and resourced, although it is noted these concerns may be mitigated through the terms of the review and/or funded by licensees.
- 1.41 On this basis a scoping exercise to establish the approach and resource requirements to review the legal status of cannabis would be necessary as a first step as recommended by the Committee *for* Health & Social Care but could be considered premature given the wider concerns facing the Bailiwick.

- 1.42 The Policy & Resources Committee notes the Committee *for* Health & Social Care's view that to progress a new Public Health (Enabling Provisions) Law is not urgent given it was first identified by Resolution in 2014; work has not been prioritised by successive health committees; and when necessary, in a pandemic scenario, the Island was able to respond within its wider legislature.
- 1.43 Nevertheless, the Policy & Resources Committee understands there are risk mitigation benefits in scoping the work to develop new legislation, as a new Law would more easily support activity where use of emergency regulations will not be an option (when the definitions within the Civil Contingencies Law are not met in order for such regulations to be made).
- 1.44 The Policy & Resources Committee is under Resolution that having consulted with the Committee *for* Health & Social Care, it shall give full consideration in the Government Work Plan Update to be debated in June 2022 to the impact of any prioritisation of a review of the Public Health Law during this term of government on the phasing and achievability of other actions.
- 1.45 The Committee has decided to set out the matter as a separate Proposition so the States can instruct the Committee *for* Health & Social Care to undertake the work they direct and also update the GWP framework accordingly through direction to the Policy & Resources Committee.

Committee *for* Home Affairs

- 1.46 The Committee *for* Home Affairs advises that the Justice Framework actions already prioritised through the GWP should remain the priorities for the States. This reflects well on the prioritisation decisions made previously. Future justice actions, where resourcing needs are identified and/or are cross-Committee in nature, that cannot be funded or resourced from within existing resources, will have to be considered for prioritisation through the GWP, alongside all other government matters.
- 1.47 The Policy & Resources Committee supports the Committee *for* Home Affairs in its determination to conclude through to implementation all the justice actions set out in the GWP. It is also cognisant of the significant draw on resources, both managing the Island's response to Brexit at the borders and the immigration issues flowing from the Russian/Ukraine conflict, including cyber security, are having on its operational and specialist staff which will make the workload challenging.

- 1.48 The Committee *for* Home Affairs is also leading on the work coming to the States later this term addressing the top ten action centred on population and immigration policies which will very likely have follow-on actions that the Committee will need to resource. The Committee has also secured funds for a pilot Sexual Assault Referral Centre (SARC) through the GWP, the exploratory work for which is progressing, and some resource issues are being flagged.
- 1.49 This extensive programme of work across the Committee's mandate is recognised by the Committee *for* Home Affairs which has identified the areas it advises the States are the top priorities for justice and is either seeking resourcing support or is developing in partnership with local entities such as the Guernsey Bar.
- 1.50 The scoping of work for the review of laws governing grounds for appeal is already progressing; has long been necessary; and should proceed to conclusion which the Committee advises it is resourcing. Likewise, the community has been waiting for the security that will be provided through an updated vetting and barring scheme underpinned by new legislation and it is an enabler for other actions important to the States with respect to provision of care services.
- 1.51 The Policy & Resources Committee is concerned that the States do not commence multiple new workstreams where funds are expended but there is not the capacity to either develop proposals for service changes or legislative support for new laws, nor to implement them successfully. On this basis and given the breadth of work already stretching the services that will deliver it, the Policy & Resources Committee is concerned that not all the actions are achievable within the next year.
- 1.52 The review of legal aid provision together with the conclusion of current actions and the new action centred on grounds for appeal would seem a full portfolio for the Committee *for* Home Affairs, given the continuing and demanding work in other areas under its mandate. Therefore, the recommendation is that the sentencing review should not be brought forward in the GWP, as has been requested, but that the legal aid review should be funded from 2023 if appropriate project management and policy development resource can be secured to support the Committee. The GWP Framework has been updated accordingly.
- 1.53 Significant pieces of legislation under the Justice Framework Action Plan have yet to be scoped but have been listed in the GWP. These therefore now meet the criteria for category 4 in the GWP; this does not preclude the service areas for which these are important legislative tools setting out the action mandate which the Committee *for* Home Affairs can bring forward for resourcing consideration in the next GWP refresh. Neither the Regulation of Investigatory Powers (RIPL) nor the Police and Criminal Evidence (PACE) legislation were originally phased for the next 12 months and therefore this does not materially change the intent

but does ensure that work commences only when the States have the capacity to conclude and implement it.

- 1.54 Finally, the enhancement of Guernsey's cyber-security legislative framework is critical, in terms of domestic safety and meeting external requirements and standards. This work will need to begin in 2022 and be concluded during this political term, and it may be that external expertise and resource can support its completion in due course. Priority 2 – meeting international standards - has been updated accordingly.

Development & Planning Authority

- 1.55 The Policy & Resources Committee has carefully considered the volume of work a review of the Island Development Plan (IDP) may generate, and not only for the Authority and its officials but also the other Committees of the States which already have a fully committed programme of work. As such, and in considering the information set out in Appendix 6, the Committee was attracted to seeking a Resolution of the States to extend the life of the current IDP in order not to commit resource to additional reviews this political term and to defer this for the next political term. However, it is also cognisant of the statutory requirement for the Authority to carry out a review the IDP within ten years of its adoption which would negate considerably the benefit of that approach.
- 1.56 The Committee also acknowledges that there are significant benefits to the priority recovery actions of government in undertaking a review of the IDP sooner, as the land use planning process is a key enabler in the delivery of government priorities and actions. It appreciates that the States require up to date, robust and relevant policies reflective of their strategic direction and priorities to progress housing, population, energy resilience, climate change mitigation and adaptation, the first steps for the blue and green economy, biodiversity, and tourism policies, and explore land use with respect to employment and agriculture.
- 1.57 The Committee understands the review can generally be resourced internally if supported with specialist consultancy, but necessary resources and funding will also need to be identified through the GWP to manage public engagement activity, the planning inquiry (which falls within the mandate of the Committee *for the Environment & Infrastructure*) and conclude publication of proposals in a policy letter. This could total up to £400k across 2023, 2024 and 2025.
- 1.58 It will also be necessary for the Authority to manage, at the same time, Local Planning Briefs for the Harbour Action Areas and potentially other strategic sites; major development proposals for housing, health and education; and plans for other key Island infrastructure; and to make legislative changes and other contributions to support the achievement of GWP priorities.

- 1.59 It will therefore be very important that the Authority adopts a proportionate approach to its management of a carefully scoped and targeted review to ensure it can conclude the work this political term which the Committee agrees is more preferable to long-term policy decisions immediately facing a new Assembly when the policy development has been driven by the previous States.
- 1.60 On balance, therefore, the Policy & Resources Committee has included funding provision for the review of the IDP from January 2023 on the basis it will be carefully managed and concluded in this political term following States consideration of the findings.

States' Trading Supervisory Board

- 1.61 The States' Trading Supervisory Board has approached the Policy & Resources Committee seeking a recommendation that the dairy replacement project should now be moved from a pipeline project to a delivery project in the GWP. The Committee does not currently agree with that recommendation (Appendix 6 refers) and is working with the States' Trading Supervisory Board to review the detailed breakdown of the costs of the project and the forecast cost of maintenance for the next four years.

2022 RECOVERY ACTIONS

Category 1

Housing

- Evaluate and implement actions to address private housing market capacity and affordability;
- Evaluate and implement actions to address key working housing capacity and affordability; and
- Progress proposals to the States by December 2022 on housing need and on management of States' housing stock.

Population

- Determine what the Island's future population and immigration policy needs to deliver and set out a pathway to address the challenges that are being faced by the economy today.

Skills and human capital development

- Agree a plan to skill our community to meet its needs; and
- embed implementation to the end of the political term.

Improve living standards

- Review minimum income standards with initial focus on income support and winter fuel allowance; and
- develop proposals on the funding options for long-term care.

Health recovery

- Determine proposals to provide targeted support based on affordability in respect of primary care appointments and access to aids and adaptations; and
- establish whether or not to explore the introduction of a compulsory insurance scheme for primary care.

Support the next generation

- Resource work to conclude amendments to the primary Children's Law and enabling Ordinances; and
- invest in education delivery through operational support to be delivered within schools and settings following Ofsted Inspection.

Energy resilience

- Develop the electricity strategy for the Island; and
- implement actions to improve the outlook for an increase in use of renewables.

Enabling climate change mitigation and adaptation

- Respond to the agreement in principle to extend the Paris Agreement to the Island by establishing an expert panel to scope a proportionate and pragmatic 'pathway to net zero' for consideration by the States in the 2023 Government Work Plan.

First steps for the blue and green economy

- Create plans, based on best available evidence, that maximise the sustainable social and economic use of our island and marine environments, including support for emerging economic opportunities (including international trade agreements), tourism, Green Finance and renewable energy.

Regeneration - future harbour requirements

- Agree the preferred direction for Guernsey's future harbour requirements to ensure that any regeneration of the seafront is within a clear strategic framework.

FUNDING & INVESTMENT PLAN UPDATE

1. Executive Summary

- 1.1. Following a strong financial performance in 2021 and changes to priorities and projects in the Government Work Plan (GWP), the Funding & Investment Plan has been updated. This is a high-level interim update on the five-year financial framework.
- 1.2. The income and expenditure position for 2021 was some £61m better than the estimates included in the Funding & Investment Plan. This, together with a slower rate of investment in infrastructure throughout 2021, meant the balance on the General Reserve was significantly higher than expected throughout the year. Therefore, with higher than anticipated investment returns, this has resulted in an improvement in investment income of approximately £28m which can be added to the overall result.
- 1.3. Together these factors have significantly improved the balance on reserves and uplifted the baseline position for some revenues, notably income tax. Given this improved position, the cumulative projections for 2022 to 2025 have improved by circa £68m. This is due to improvement to income and investment return forecasts, partly offset by forecast increases in expenditure on GWP actions and lower levels of savings overall due to delays in their delivery. This improvement has also been offset by an estimated increased cost of capital and transformation programmes totalling £13m.
- 1.4. Overall, the improvements mean that there is now unlikely to be a need for any new external borrowing in this term to fund the capital portfolio. This is an excellent result which has been driven in large part by the faster recovery in 2021. However, execution of the plan will still result in the majority of the States' financial reserves being exhausted over the remainder of this term.
- 1.5. The revised projections indicate a surplus before capital expenditure over the Plan period which will fall from £25m in 2022 to £5m by 2025. The shrinking surplus comes about because of the demand pressures on public service expenditure, particularly in relation to health and care services, coupled with strain on revenues as a result of a reduction in the working population and the introduction of secondary pensions.
- 1.6. These small surpluses are not sufficient to fund the necessary investment in island infrastructure. They are too small even to fund the everyday replacement of equipment and vehicles, renewal of roads and investment in property assets, classed as Minor Capital.

- 1.7. The underlying position remains a structural deficit beyond this term which, for General Revenue, is estimated to be approximately £50m when the long-term infrastructure funding needs are factored in. In addition, the States are running a deficit on the social security schemes, in particular the States' pension, which have a long-term funding requirement of £34m a year. Therefore, the overall structural deficit remains in line with previous forecasts of £80-90m.
- 1.8. The investment return on the reserves supports capital investment and makes the Plan affordable without any new borrowing in this term. However, the level of return can be volatile (as seen by the movement in investment markets in the first quarter of 2022) and cannot be relied on to support future expenditure since the reserves are being spent to support delivery of this Plan.

2. Background

- 2.1. The Funding & Investment Plan is an integral part of the GWP and sets out the financial planning framework within which the States will operate and resource. The Plan considers all aspects of income and expenditure including business as usual, previous policy decisions and service developments, Brexit, COVID-19, recovery actions and capital investment.
- 2.2. As set out in the 2021 Funding & Investment Plan, the process of building it incorporated all financial matters known at the time of preparation (Spring 2021). This was then augmented by best estimates based on informed assumptions to forecast future outcomes. It is not intended to be a firm plan of what will happen over the period and illustrates a wide range of possible outcomes derived through flexing the key assumptions.
- 2.3. The Funding & Investment Plan was compiled as the financial planning framework for this term of government and therefore spanned the five years 2021 – 2025. However, it is the intention of the Policy & Resources Committee to undertake a periodic review and high-level re-forecast of the plan based on experience in the previous year, any changes in the economic climate or outlook and any changes to the States' priorities.
- 2.4. Therefore, the Plan has been updated to incorporate the financial outturn from 2021, any changes to forecasting assumptions based on economic conditions or changes to the baseline. It also incorporates the financial implications of any proposed changes to GWP workstreams so that these can be budgeted in future years.
- 2.5. The Plan has been updated with 2021 actual income and expenditure and the estimates for 2022 to 2025 updated with the latest projections. All forward projections have been included at 2022 prices apart from the estimates for capital

schemes not yet commenced which have incorporated future years' inflation estimates.

3. 2021 Financial Outturn

- 3.1. The outturn for 2021 was significantly better than had been estimated when the 2021 Budget was compiled in mid-2020 as the financial and economic impacts of the global pandemic were at their most acute; and when the Funding & Investment Plan was compiled in the Spring of 2021.
- 3.2. The table below compares the actual performance in 2021 with that set out in the Funding & Investment Plan. It also contains the equivalent numbers for 2019 (being the last true baseline year ahead of the impact of COVID-19) and 2020 for comparison purposes:

	2019 Actual £m	2020 Actual £m	2021 F&I Plan ¹ £m	2021 Actual £m
General Revenue Income	476.8	473.8	475.0	512.8
Income Tax – Personal	276.6	267.0	279.7	290.3
Income Tax – Other	72.5	61.4	64.6	71.3
Customs Duties	44.5	51.3	42.3	48.1
Document Duty	18.2	23.0	21.5	32.3
Company Fees	11.0	9.9	9.9	10.6
TRP	25.3	29.1	29.3	28.8
Other Income	28.7	32.0	27.7	31.4
General Revenue Expenditure	418.5	517.7	521.6	498.0
Committee Cash Limits	408.8	426.0	468.5	452.3
Business Support	-	51.2	26.8	22.4
Aurigny Loss	9.7	35.2	14.0	14.7
Guernsey Ports	-	5.3	12.3	8.6
Surplus/(Deficit)	58.3	(43.9)	(46.6)	14.8
Investment Income	34.5	22.7	9.6	37.7

¹ The impact of the transfers in respect of the Guernsey Health Service Fund – contribution income, service expenditure and grants to the Committee for Employment & Social Security have been removed from these estimates as these changes did not take place until January 2022

3.3. Revenue income generated an additional £38m against the Funding & Investment Plan estimate. This was driven predominantly by:

- Income tax – Personal

The growth in ETI between 2020 and 2021 was 7% representing a sharp bounce back from reduced revenues during the COVID effected year. Comparing ETI to the last baseline year of 2019 shows growth of 6% indicating that the trajectory has recovered to pre-COVID levels. There were no material changes in the numbers of either employers or employees.

Collections from non-ETI individuals showed a significant bounce back – of 16% - versus 2020 which was heavily impacted by COVID. When compared to 2019, more modest growth of 1.4% is evident.

In total, personal income tax in 2021 exceeded the Funding & Investment Plan estimate by £10.6m or just under 4% and showed 5% nominal growth on 2019 (a real terms reduction of 1.3%).

- Income Tax – Other

Income tax collections from businesses and through distributions exceeded the Funding & Investment Plan estimate in total by some 10%, or £6.7m. Broadly, these revenue streams bounced back to where they would have been expected to be if forecasting pre-COVID nominal levels.

- Customs Duties

2021 was another good year for Customs Duties overall.

Approximately half of the income in this category is derived from fuel duty. Lockdowns in 2020 and 2021 led to a reduction in the volumes of fuel consumed (in addition to the reduction assumed in relation to the transition to electric cars) resulting in a reduction in fuel duty collected. Overall, fuel duty receipts fell by 9% between 2019 and 2021.

The remainder of the duties levied on tobacco and alcohol continued to benefit from the restrictions on travel and resulting lack of access to duty free purchases. This heightened revenue is not expected to continue in 2022.

- Document Duty

The total number of property conveyances in 2021 was 7% ahead of 2020 and 12% up on 2019. However, document duty receipts have grown by 40% against

2020 and 77% against 2019 due to a combination of the mix of properties conveyed and the significant increase in residential property prices over the period (11.8% increase in 2020 and a further 11.7% in 2021).

- 3.4. The improvement against the Funding & Investment Plan estimates on revenue income in 2021 was accompanied by lower than estimated expenditure overall.
- 3.5. Principal Committees collectively spent less than the previous estimates by a total of £11m. The overall pay budget was 1.3% underspent and the non-pay budget was some 4.6% less than budgeted. The large majority of these underspends are attributable to the exceptional conditions resulting from the ongoing pandemic and expenditure is expected to recover to more normal levels in 2022.
- 3.6. A balance of £11m remained unspent in the Budget Reserve at the end of the year. The majority of this can be accounted for by pay awards costing less than had been allowed in the budget and the full amount set aside for COVID related costs (in particular the vaccination and testing programmes) not being required.
- 3.7. Further to this, £6.5m set aside to fund service developments in line with the GWP was not required. The budgeted allowance for such development was £10.2m in 2021.
- 3.8. Largely due to the impact of COVID, many of these developments were implemented later than had originally been planned, meaning that the in-year cost in 2021 was only £3.7m. However, half of the £10m total was to fund NICE drugs and treatments. While the roll out of these drugs and treatments commenced later than planned and therefore saved £4m in 2021, the baseline will still have increased as a result and the funding will be required in 2022 and future years.
- 3.9. These improvements were offset by the delay in the delivery of planned savings through the transformation of public services. There was a shortfall in this area of £6m in 2021 caused by continuing management of the pandemic absorbing critical resources and delaying the delivery of projects. A sizeable proportion of those savings are now expected to be delivered in 2022 & 2023.
- 3.10. As highlighted in the Funding & Investment Plan, 2021 saw significantly higher than budgeted expenditure on business support because of the second lockdown and the decision to support a limited number of sectors throughout 2021. This led to an additional £17m being spent versus the original budget to support the economy, which has contributed to very low levels of unemployment and the sharp recovery of industry, as demonstrated by the positive Income Tax results and low number of business failures. However, the ultimate expenditure was £4.4m less than was set out in the Funding & Investment Plan due to those sectors being supported performing better than anticipated in the second half of 2021.

- 3.11. All these factors resulted in what had been budgeted as a deficit of £33m and a Funding & Investment Plan forecast deficit of £47m, becoming a surplus for the year of £15m. The improvement against the estimates set out in the Plan was therefore £61m meaning that the General Reserve balance has increased accordingly.
- 3.12. The improvement above and a slower rate of investment in infrastructure throughout 2021 meant the balance on the General Reserve was significantly higher than expected throughout the year. 2021 was also an excellent year for investments with the portfolio in which the General Reserve is invested achieving a return of 9.7%. When this is added to the fact that the return was achieved on higher than anticipated balances, an improvement in investment return of £28m can be added to the overall result.
- 3.13. In total then, the improvement in 2021 amounts to £89m for general revenue. This has had a significantly positive impact on the overall position and resulted in additional reserves being available to support necessary investment in national infrastructure. However, it is not expected that the full value of this improvement will persist and become part of the baseline. The economic recovery was faster than anticipated and the exceptional circumstances experienced in 2021 are considered to be temporary, particularly in relation to the high levels of document duty receipts as a result of the exceptionally strong housing market; and customs duties which have benefitted from reduced access to duty free products as a result of travel restrictions.

4. Changes for 2022-2025

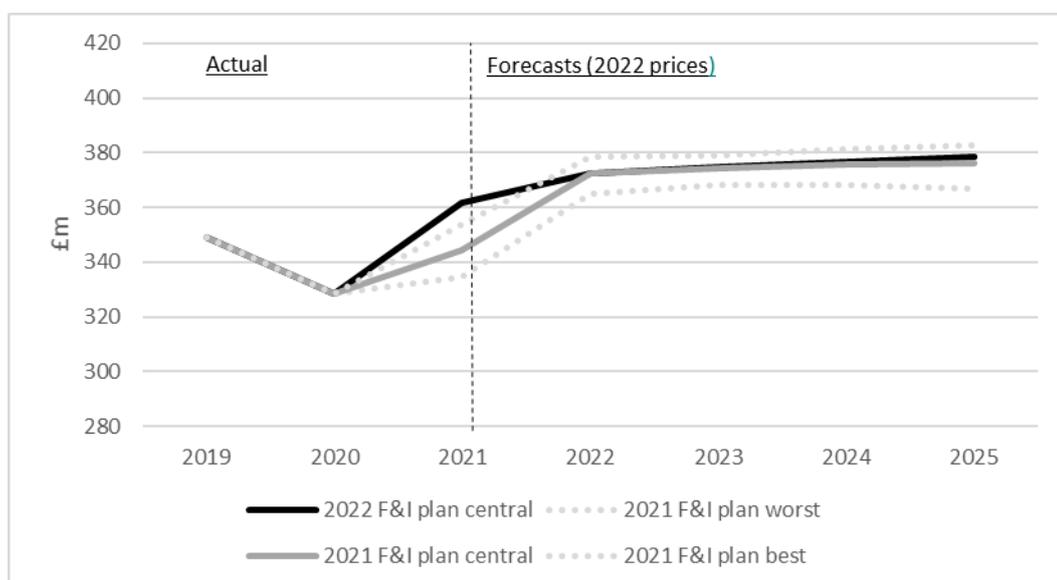

4.1. The Funding & Investment Plan financial model has been updated taking into account the 2021 outturn, bringing all figures to 2022 prices, and incorporating the latest projections around the GWP initiatives. The revised financial position over the period to the end of 2025 is shown in the table below and explained further where there have been changes:

<u>£m</u>	MIDDLE CASE				
	2021	2022	2023	2024	2025
General Revenue Income	541.9	541.8	545.4	545.5	546.4
Income Tax - Personal	290.3	302.1	303.5	303.1	303.8
Income Tax - Other	71.3	70.6	71.0	71.4	71.7
Contributions (GHSF)	29.1	29.1	31.1	31.3	31.5
Customs Duties	48.1	47.8	47.2	46.7	46.1
Document Duty	32.3	23.0	23.3	23.5	23.8
Company Fees	10.6	10.8	10.9	11.0	11.1
TRP	28.8	32.8	32.8	32.8	32.8
Other Income	31.5	25.8	25.6	25.8	25.6
General Revenue Expenditure	(505.3)	(516.6)	(528.4)	(532.0)	(537.4)
Committee Cash Limits	(482.9)	(509.7)	(527.5)	(531.1)	(536.5)
COVID-19 Management	(22.4)	(8.0)	(2.0)	(2.0)	(2.0)
Unallocated Savings	-	1.1	1.1	1.1	1.1
Baseline - surplus/(deficit)	36.6	25.2	17.0	13.5	9.0
States Trading Assets*	(23.4)	-	-	-	-
Capital Income		3.0	1.0	1.0	1.0
Adjusted Baseline Position	13.2	28.2	18.0	14.5	10.0
<u>GWP Revenue Impact</u>					
Brexit	-	(0.9)	(1.0)	(1.1)	(1.1)
Recovery (on-going)	-	(2.0)	(6.1)	(5.7)	(5.5)
Transformation Savings	-	-	0.9	1.8	2.6
RICE	-	(0.8)	(1.3)	(2.4)	(3.6)
Budget Measures	-	-	1.0	2.0	3.0
Overall Surplus/(Deficit)	13.2	24.6	11.4	9.2	5.3
Net Investment Return	37.7	46.1	26.6	16.0	10.2
Position after Investment Return	50.9	70.6	38.0	25.2	15.5

Baseline

4.2. The 2022 to 2025 baseline projections have improved by circa £68m in aggregate.

- 4.3. All revenue income baselines have been updated to the 2022 starting position and growth assumptions applied. The main assumptions have remained largely unchanged.
- 4.4. However, the projections in the 2021 Funding & Investment Plan relating to income tax receipts assumed a more gradual recovery than has occurred. As a result, whilst income tax receipts were significantly higher in 2021 than anticipated, they are expected to grow considerably more slowly through 2022 to 2025 and return to more usual growth patterns. In particular, it should be noted that high levels of inflation may suppress real growth in incomes during 2022 if wage growth does not keep pace with RPIX.
- 4.5. The chart below illustrates the difference between income tax forecasts in the original Plan and following this update. It shows that there is expected to be a £2m improvement in the 2025 baseline position when adjusted for inflation.

- 4.6. Although Committee expenditure was lower than budgeted during 2021, it is expected that this will now bounce back to budgeted levels. However, the net position on expenditure has worsened slightly due to the impact of a delay in the delivery of savings and those achieved to date being lower than planned.
- 4.7. Although it is anticipated that expenditure in relation to COVID (largely testing and vaccinations) will be lower than budgeted in 2022, this budget was higher than the amount assumed in the last version of the Funding & Investment Plan and therefore this has been adjusted accordingly.

GWP Impact

- 4.8. As part of the refresh, the financial implications of all changes to priorities have been captured and the costs of the existing priorities refreshed. This has resulted in a total net increased cost impact of £7.5m over the period 2022-2025. This is made up of a combination of one-off and ongoing funding which is set out in the table below:

GWP Priorities - Recovery - Revenue Expenditure (one-off and on-going) £'000	F&I Plan 2021	Refresh 2022	Change	Ref.
Invest in the Finance Sector	3,000	3,000	-	
Accelerate the digital economy	-	-	-	
Unlock enterprise	1,700	1,650	- 50	1
Invest in the Visitor Economy	-	-	-	
Invest in Nature and the Natural Economy	711	1,539	828	2
Enable opportunities for regeneration	975	1,075	100	3
Secure future energy requirements	-	350	350	4
Secure transport connectivity and infrastructure	3,200	3,200	-	
Promote Education, Skills and Learning	4,400	9,409	5,009	5
Meet Housing Needs	-	332	332	6
Keep the Island safe and secure	3,908	4,088	180	7
Promote responsive population measures	-	-	-	
Support healthy living	8,550	8,050	- 500	8
Enable Accessible and Affordable 21st Century Health and Care Services	150	1,410	1,260	9
TOTAL REVENUE SPEND	26,594	34,103	7,509	

1. Delayed start to “Explore opportunities for further development of the general and commercial aviation sectors”.
2. This is comprised of new actions: "Statutory review of the IDP" (£400k one-off), "Establish path to net zero" (£250k one-off) and "Prepare and implement updated animal welfare legislation" (£50k pa on-going, £200k in plan to 2025).
3. This is an additional cost in respect of an existing priority: “Determine future use of Les Vardes Quarry” for an environmental impact assessment (£100k one-off).
4. This one-off funding supports updating the Electricity Strategy and developing a business case for energy generation mix (£350k).
5. This comprises new action “Education Recovery” (£1.3m one-off across 2022-24 plus £1m per annum on-going from 2023) plus £640k funds to implement nasen SEND provision, £160k to invest in Ofsted inspection response and £75k to support Education Law review. These have been part offset by lower funds expected for action “Agree plan to skill our community to meet its needs (£300k).

6. An increased one-off cost to “implement housing market intervention options” (2022-23 £250k one-off) plus “Develop, legislate and implement housing standards” (£82k).
7. New actions “Evaluate and appraise learning from COVID response” (£40k one-off) and “Review of Public Health Law/legal status of cannabis review” (2024 £100k one-off), plus an increase of £40k for the implementation of updated domestic abuse strategy.
8. This reduced cost is the net impact of a £900k reduction in funding for the waitlist initiative by part offset by the cost of a new action “Tier 3 & 4 healthy weight strategy” (£150k pa on-going, £450k in the plan to 2025).
9. This is comprised of:
 - a. New actions:
 - i. “Design and implement a scheme for the Funding of Medical Treatment for Guernsey and Alderney Residents travelling in the UK” (£300k pa, £900k in plan)
 - ii. “Review funding options for long-term care” (£150k one-off)
 - b. Changes to funding requirements:
 - i. “Enhanced mental health pilot” (£150k one-off)
 - ii. “Determine proposals to increase affordability of primary care appointments and aids & adaptations and establish whether to explore the introduction of a compulsory insurance scheme (including an update on the Bailiwick Social Prescribing Pilot) ” (£60k one-off).

4.9. The total impact of these changes across 2022-2025 is £7.5m with an ongoing increase in the baseline expenditure of £2m per annum by 2025.

4.10. The forecast costs accompanying the listed recovery actions are best estimates only at this stage. It is recognised that ultimate funding requests may be higher or lower than the figures provided and some of the priorities which currently show no funding required might, in due course, need to be funded. There will be appropriate review and challenge undertaken prior to any funding being recommended or released.

Capital & Transformation Programmes

4.11. The funding requirements of the portfolio of programmes – both capital and transformation – have been reviewed and updated and the changes from the original Funding & Investment Plan are captured in the table below:

Capital & Transformation Spend (2021 to 2025) £m	F&I Plan 2021	F&I Plan Refresh 2022	2022 vs 2021	Ref.
Major Capital	433	439	(6)	1
Minor Capital	123	95	28	2
Contingency	13	35	(23)	3
Transformation	26	39	(13)	4
Total Capital & Transformation	594	608	(13)	

1. £14m of costs have been moved between capital and transformation due to the nature of the spend. When comparing to the 2021 Funding & Investment Plan, this means there is an actual **increase of £20m** in major capital expenditure projections.

Estimates for capital projects have been inflated in each year assuming the following inflation rates: 2023 – 3.5%; 2024 – 2.5%; 2025 – 2.5%. It is acknowledged that there is a risk that the inflationary impact on capital projects may be significantly more which has been allowed for through increased contingency (3 below), and covered in the section on Risks & Opportunities.

2. The expenditure in 2021 was £13m less than anticipated and the ability to complete minor capital projects continues to be constrained by limited resources. Therefore, projections have been reduced by circa £4m per annum in this update from £24m to circa £20m per annum.

3. The contingency has been increased due to uncertainty around inflation.

4. The increase is due only to the transfer of programme running costs which were previously categorised as capital.

4.12. The net impact of the updated position in respect of capital and transformation programmes is increased cost of £13m over the plan period.

Investment Income

- 4.13. As set out in section 3 above, the combination of a surplus in 2021, slower expenditure on capital programmes than planned and good investment return resulted in investment income of £37.7m in 2021 which will be used to fund future expenditure.
- 4.14. Given that the starting position is now £93m improved, the benefit of higher investment returns (which are assumed at inflation plus 2.5% throughout the plan period) persists throughout the period.
- 4.15. It had previously been assumed that investment income would be available to service borrowing costs. Given the improvement in the overall position over the period and the likely removal of the borrowing requirement, investment income will no longer be needed for that purpose which further improves the position and the amount available to fund capital expenditure.

5. Funding & Financing

- 5.1. The 2021 Funding & Investment Plan ensured that all the priorities for this term of government were fully funded through use of a combination of reserves and borrowing.
- 5.2. The table below summarises the funding required for one-off activities over the remainder of the period (that is having factored in the expenditure which has already taken place in 2021). This shows that it is now expected that £583m will be required between 2022 and 2025:

Funding Required 2022-2025	£m
Major Capital	410
Minor Capital	84
Contingency	35
Total Capital	528
Recovery (one-off)	18
Transformation	37
Total One-Off Spend	55
Total Capital & One-Off	583

- 5.3. The Policy & Resources Committee had previously recommended that a minimum balance be retained on the General Revenue Reserve of £150m to provide resilience, guard against future shocks and ensure that limited reserves are available for the next States. The Committee also recommended that the Health Service Reserve be used to fund the implementation of the changes to the availability of NICE approved drugs and treatment and to cover the cost of

reducing the backlog of elective procedures because of COVID-19, as prioritised in the GWP.

5.4. The Committee has retained the same assumptions in this update.

Existing Reserves/Bond £m	Balance 31.12.21	Available to Use
General Revenue Reserve	587	437
Health Service Reserve	120	41
Surplus 2022-2025		149
Available Reserves	707	627
Funds Required		583
Borrowings required		nil

5.5. The table above also includes the annual estimated surplus from 2022 to 2025. This was not included in the 2021 Plan since it was assumed that any surpluses would be accumulated to service and/or repay the borrowing. Given the improved position overall, these surpluses are now available to support the required investment.

5.6. This means that sufficient reserves are now available to support the desired investment over the remainder of this term without any recourse to borrowing which compares to the borrowing requirement of £200m previously identified. The table below explains the attribution of this improvement:

F&I Plan Movement	£m
2021 net result	93
2022 - 2025 net result	68
Assumed servicing of borrowing in F&IP	79
Capital & Transformation forecast spend	(13)
GWP one-off	(3)
Higher transfer from bond reserve	10
Increase use of Health Service Fund	7
Other	8
Total Movement	249

5.7. This is an excellent result which has been driven in large part by the faster recovery in 2021. A Resolution from the debate on the GWP in 2021 allows the Policy & Resources Committee to enter into new external borrowing facilities up to a total maximum of £200m. According to the latest update, it is not anticipated that such borrowing will now be required. However, due to the continued uncertain economic conditions, the Committee does not wish to ask at this stage that the

Resolution is rescinded. When the Funding & Investment Plan is reviewed in 2023, the forecast will be re-evaluated again. If it is still estimated that no new long-term borrowing will be required, the Committee will ask the Assembly to rescind that Resolution.

- 5.8. Although it is not now anticipated that new long-term borrowing will be required to fund the Plan, its execution will still result in most of the States' financial reserves being exhausted over the remainder of this term.

<u>£m</u>	MIDDLE CASE				
	2021	2022	2023	2024	2025
Net Result Surplus/(Deficit)	13.2	24.6	11.4	9.2	5.3
Investment Return	37.7	46.1	26.6	16.0	10.2
Net Result (incl. investment return)	50.9	70.6	38.0	25.2	15.5

- 5.9. The table above shows the estimated overall surplus before capital expenditure over the Plan period. The baseline position shows a surplus of £24.6m in 2022 falling to £5.3m by 2025. The shrinking surplus comes about because of the demand pressures on public services, particularly in relation to health and care services, coupled with strain on revenues as a result of changes to the working population and the introduction of secondary pensions.
- 5.10. These small surpluses are not sufficient to fund the necessary investment in Island infrastructure. They are too small even to fund the everyday replacement of equipment and vehicles, renewal of roads and investment in property assets, classed as Minor Capital.
- 5.11. The investment return on the reserves supports capital investment and makes the Plan affordable without any new borrowing in this term. However, the level of return can be volatile (as seen by the movement in investment markets in the first quarter of 2022) and cannot be relied on to support future expenditure since the reserves are being spent to support delivery of this Plan.
- 5.12. The only usable reserves remaining after delivery of this plan would be £150m in the General Revenue Reserve, £80m in the Health Service Reserve and an assumed £197m in the Core Investment Reserve (£179m at the end of 2021 with return assumed at inflation plus 2.5% each year thereafter). This would give a total reserves balance of £427m against an annual turnover of approximately £540m. This is a total reserves ratio of only 79% whereas the States have a policy of the Core Investment Reserve alone having a balance of 100% of revenues.
- 5.13. The best- and worst-case scenarios set out in Annex 1 illustrate the range of possible likely outcomes and that the surplus by 2025 could be higher at around £28m or be converted into a deficit of £29m. However, the trend remains the same with surpluses shrinking/deficits growing. With the continued and essential need

to invest in infrastructure both to maintain and replace current assets and develop new ones, there remains a significant underlying structural deficit which must be addressed.

6. Risks & Opportunities

Inflation

- 6.1. During 2021 and the first quarter of 2022, worldwide inflation has been increasing because of the economic disruption caused by the pandemic and the disruption it has caused to global shipping and, latterly, the impact of the conflict in Ukraine. RPIX is currently well above recent averages (5.9% in March 2022) and is expected to increase further through the second and third quarters, before reducing in 2023. This represents a real risk to the States' financial position. Should inflation increase both revenues and expenditure equally, then the impact will be minimal. However, should price inflation increase sharply and revenues do not keep pace in real terms, then it could result in a significant deterioration in the financial position.
- 6.2. One very real risk around inflation is centred on capital investment, particularly given the extent of the current price pressure on construction costs resulting both from the strength of demand and the difficulty in obtaining supplies. The States have started to observe significant increases, especially in the price of certain raw materials. Although inflation assumptions have been factored into the capital requirements, these might prove to be insufficient.

COVID-19

- 6.3. The Plan update has continued to assume no further lockdowns, travel restrictions or business support. Based on the levels of immunity in the population and current policy, these are reasonable assumptions. Any changes to the current approach, as a result of a new variant or other similar developments, could have a cost risk.

Public Service Transformation

- 6.4. A risk adjustment has already been made in this Plan in relation to the delivery of savings from Public Service Transformation. The middle case assumes that 60% of the savings forecast will be achievable. However, there is still a notable risk that savings will not be fully realised and that there will be a shift in the cost of delivering transformation activity. Conversely, there is an opportunity overall should the level of projected savings be delivered which would considerably strengthen public finances.

Financial Implications of the GWP Priorities

6.5. The GWP actions have been costed using the best information available. However, many actions continue to be in the early stages of development with many unknown factors about how they might be delivered. Experience over the last year has revealed that some workstreams have costed more than indicated or that costs were simply not foreseen. As set out in this update, additional actions with cost have been identified and costs relating to other actions have increased. There is a significant risk that costs will be higher or lower than the financial estimates included in this Plan.

General Cost Pressures

6.6. There is a risk that when preparing the budget each year further cost pressures or service developments not included in the Plan are identified

Housing Stock Transfer

6.7. A project to explore the transfer of all States' housing stock to the GHA has been initiated. The preferred model would be that the housing stock would be sold to the GHA which would take ownership and day to day responsibility of its management. If such a transfer did happen then this would result in a negative net impact to general revenue of approximately £12m per annum although this would be compensated by a capital receipt for the sale.

Guernsey Waste

6.8. The States have agreed a waste strategy which is being implemented by Guernsey Waste. The original expectation was that over the life of the strategy, it would break even with the overall costs of collection and processing balanced by various charges. However, largely because of the significant reduction in the number of black bags being disposed of, Guernsey Waste currently has an accumulated deficit of circa £3.5m with ongoing deficits forecast in the range of £1.1-1.5m per annum. Should a self-funding solution not be found which does not run counter to the strategy, then this cost pressure could fall to general revenue.

Conflict in Ukraine

6.9. The conflict in Ukraine is having and will continue to have far reaching implications. Inflation has already been highlighted as a risk which could be (and already has been) exacerbated by the situation in Ukraine. Any escalation of the conflict will only intensify these risks.

6.10. In addition, the Bailiwick is also welcoming refugees from the war through the Family and Homes for Ukraine schemes. There will be consequential costs although it is too early to estimate the extent of these.

Economic Factors

6.11. The economic environment is both a risk and an opportunity to the Funding & Investment Plan. As experienced in 2021, recovery and economic growth rates can have a significant impact on general revenue income. The measures prioritised in the GWP to enhance and encourage growth of the Bailiwick's economy, if successful, could present a sizeable boost to both the economy and general revenue income.

6.12. However, the availability of suitable labour and the increasing cost of housing have been widely cited by industry representatives as limiting factors on economic expansion.

EXTANT STATES' RESOLUTIONS RECOMMENDED FOR RESCISSION

No.	Year	Billet d'État	Committee / Authority sponsor(s)	Policy Letter Title	Resolution	Reason for Rescission
1.	2020	X	Committee <i>for</i> Economic Development	Requête - Ensuring that a Policy Letter on the Policy Governing 5G Technology is Debated by the States Assembly	1. To direct the Committee <i>for</i> Economic Development to present a policy letter to the States of Deliberation no later than the end of 2020, detailing its recommended policy on 5G technology, including specific reference to the licence conditions and criteria.	This Resolution has been superseded by the Committee <i>for</i> Economic Development's 'Delivering Next Generation Digital Infrastructure' policy letter which was debated in October 2021.
2.	2020	XVI	Policy & Resources Committee	Improving Living Standards	1. To direct the Policy & Resources Committee to incorporate within the scope of the Recovery Action Plans for the Recovery Strategy, the vision and objectives for Improving Living Standards set out in Section 4 of the Policy Letter; and	The Recovery Strategy has been superseded by the GWP, in which the objectives and outcomes of Improving Living Standards have been accommodated.
3.	2020	XIII	Policy & Resources Committee	Revive and Thrive: Our Recovery Strategy for	2. To direct the Policy & Resources Committee to consult further in preparing the Recovery Action Plans for the Recovery Strategy and report back to the States as soon as practicable.	This has been superseded by the GWP and its processes of engagement.

No.	Year	Billet d'État	Committee / Authority sponsor(s)	Policy Letter Title	Resolution	Reason for Rescission
				Guernsey Together		
4.	2020	Rule 18	Policy & Resources Committee	COVID-19 Pandemic - Funding of Financial Response	2c. To agree that the Policy & Resources Committee will ensure that regular reviews, as referenced in 2(b)(iii), take place to provide assurance on the Recovery Plan and its delivery, initially on a six-monthly basis.	This has been superseded by the performance monitoring framework process of the GWP.
5.	2019	XVI	Policy & Resources Committee	Transforming Education Programme & Putting into Effect the Policy Decisions made by the States in 2018	2. To note that the capital costs of the policy of organising further and higher education in purpose-built facilities on a single site, which was agreed by the States on the 19th of January 2018, will be up to a maximum of £51.1 million; direct the Policy & Resources Committee to add this project to the capital portfolio 2021 – 2025; and delegate authority to the Policy & Resources Committee to approve expenditure up to a maximum of £51.1 million charged to the Capital Reserve (in respect of the total project costs comprising building; transformation and transition) subject to the approval of appropriate business cases submitted by the Committee <i>for</i> Education, Sport & Culture which must demonstrate that the financial resources requested for the construction and	This has been superseded by the Committee <i>for</i> Education, Sport & Culture's policy letter on Reorganisation of Secondary & Post-16 Education debated in June 2021.

					facilitate the development of the site and the funding of the same.	
9.	2019	IX	Policy & Resources Committee; Committee <i>for</i> Employment & Social Security	Policy & Resource Plan - 2018 Review and 2019 Update	1. To direct: h) the Policy & Resources Committee, guided by existing States Resolutions on in-work poverty and working with the Committee <i>for</i> Employment & Social Security, other States Committees and the third sector, to undertake preparatory investigations of policies successful in breaking poverty, with a specific focus on generational focus.	The Resolution should be rescinded as co-ordination of policy reviews and new policy development is now driven through the GWP.
10.	2017	XXIV	Committee <i>for</i> Education, Sport & Culture; Committee <i>for</i> Health & Social Care	A Partnership of Purpose: Transforming Bailiwick Health & Care	13. To direct the Committee <i>for</i> Education, Sport & Culture, together with the Committee <i>for</i> Health & Social Care, to review the training and education provided by the Institute for Health and Social Care Studies to ensure that it continues to meet the health and care needs of the Bailiwick, and to explore options for supporting a wider range of on- and off-island training opportunities;	This Resolution has been superseded by the 2018 Resolution (Billet II, Res. 16) from the Committee <i>for</i> Education, Sport & Culture's policy letter titled 'The Future Structure of Secondary and Post-16 Education in the Bailiwick'.
11.	2012	III	States' Trading Supervisory Board	Future Business Environment for Guernsey Water and	4. To agree that the water utility Sector Law described in proposition 3 shall also provide for regulation by the Director of Environmental Health and Pollution Regulation in regard to water quality.	This Resolution arises as a consequence of - and refers to - Proposition 3, which was rescinded by the States in

No.	Year	Billet d'État	Committee / Authority sponsor(s)	Policy Letter Title	Resolution	Reason for Rescission
				Guernsey Wastewater		2021. Proposition 4 therefore needs to be rescinded.
